

The first was that of a lady, the subject of a periodically recurring hemi-crania of a decidedly neurotic type, upon whom the usual remedies had *ad nauseam* been tried, with occasional benefit alternated with disappointment. This led me to persevere with Antikamnia tablets, one every two hours for eight doses. This case having secured for me a meed of confidence, I have labelled it, mentally, as my first success with this preparation.

The second one is that of a man aged forty-five, the subject of asthma of a pulmonary type and associated with gastric troubles, for whom I was in the habit of prescribing alkalies. In this case I am now observing the gradually increasing evidences of the benefit of Antikamnia and Codeine tablets, which, up to the time of writing, have not failed or fluctuated in their analgesic and stimulating action upon my patient's asthmatic condition.
