

tion of Bichloride of Mercury. These douches produced a great deal of pain and did not appear to benefit the case materially. When the patient came to me I found the cervix much congested and the vaginal mucous membrane eroded to a considerable extent. Decided to try douches of a weak solution of Glyco-Thymoline, to be taken as hot as possible. Comfort and improvement were noted from the first douche, and in a few weeks the woman was well.

COMMENT ON ANTIKAMNIA AND HEROIN TABLETS.

Under the head of "Therapeutics," the *Medical Examiner* contains the following by Walter M. Fleming, A.M., M.D.,* regarding this valuable combination: "Its effect on the respiratory organs is not at all depressing, but primarily it is stimulating, which is promptly followed by a quietude which is invigorating and bracing, instead of depressing and followed by lassitude. It is not inclined to affect the bowels by producing constipation, which is one of the prominent effects of an opiate, and it is without the unpleasant sequels which characterize the use of morphine. It neither stupefies nor depresses the patient, but yields all the mild anodyne results without any of the toxic or objectionable phases.

When there is a persistent cough, a constant "hacking," a "tickling" or irritable membrane, accompanied with dyspnoea and a tenacious mucous, the treatment indicated has no superior. In my experience I found one "Antikamnia and Heroin Tablet" every two or three hours, for an adult, to be the most desirable average dose. For night-coughs, superficial or deep-seated, one tablet on retiring, if allowed to dissolve in the mouth, will relieve promptly, and insure a good night's rest. In short, it will be found futile to delve for a more prompt and efficient remedy than "Antikamnia and Heroin Tablets" in all bronchial general irritability of the thoracic viscera."

SANMETTO IN URINARY DISEASES.

Dr. Mann Page, of Warm Springs, Va., Graduate Medical Department, University of Va., 1897, writing, says: "I have used Sanmetto in almost every case of kidney trouble that has come to me during the past year, and the results obtained in all cases from the "temporary congestion" so often accompanying "cold," etc., to the acute and chronic cases of "true inflammation" have been most gratifying. I am now using Sanmetto in several cases of albuminuria accompanying pregnancy, with benefit to every one of the patients. In cases of irritability of the bladder, from the least degree of this class to the most acute cases of inflam-
