

UNBIDDEN GUESTS.

**METEORIC STONES ARE NOW** known to descend periodically on certain zones of the earth. Almost all of these meteoroids contain iron, and most of them contain a proportion of the metal known to commerce as "Nickel." This metal, separated from its ores, and alloyed with more ductile metals, produces the celebrated article known as

**NICKELITE SILVER.**

Spoons and forks made of this metal have almost all the properties of silver, being HARD, WHITE, and TASTELESS, yet they can be sold for less than one-tenth of the price. All articles made of this metal are stamped "R. W. & Co., Nickelite," and are highly warranted. No others are genuine. For Hotels, Restaurants, and private families they are unequalled. To be had of all dealers.
