A great need has existed for an up-to-date book dealing with the problems of the Western Canadian farmer in the production of grain and other crops.

CROP PRODUCTION IN WESTERN CANADA

BY

Dr. H. C. Bracken
University of Manitoba

To fill this need—No one is so well qualified as Prof. Bracken to produce a book on this subject. It is based definitely on experiments conducted and observations made in Western Canada, and contains the fullest and most reliable information about all the great cereal and fodder crops grown.

The book gives a very good idea of the various factors affecting Production.

CONTENTS

- 1. The Soil and its Seeds
- 2. Crops and Crops
- 3. Plant Factors Affecting Plant Growth
- 4. Water and Crop Yield of the One-Plains
