GOODS ON APPROVAL. A St. John Merchant Pointe Out the Faults

of the System. A St. John merchant contributes to the Times the following pertinent remarks on what he terms "the ap-probation nuisance." "The following are a few facts in onnection with the above nuisance which speak very strongly for the

abolition of it.

"First, from the merchants standpoint a great many bad accounts are
traceable to the practice of sending
goods on approval to parties to
whom straight credit would be refused. For instance, a saleman has a

time and all were more or less injured.

The German coach stallion Belchazzar, valued at twelve hundred dolars, was so badly injured that he had to be shot this morning. He was imported from Indiana last spring, and won a prize at the last Halifax Exhibition.

The imported French coach stallion Remus, purchased by Jewett from Nova Scotia parties two years ago is not expected to survive his injurices.

The three year old red hackney Hamlet got off easily and will recover.

The stallions were insured by the Scottish Union for five hundred dolars each, and the barn was insured for one hundred. The general opinion is that the fire was of incendiary origin.

Considerable ice formed in the riv
habit (for it is certainly nothing more than a habit with a large werl and in the scommunity) is the fact that sales are constantly being lost in consequence of something like 200,000 tons number of peeple in this community) is the fact that sales are constantly being lost in consequence of hundreds of dollars worth of sale able goods being out on approval, two thirds of which are never kept, while had these same goods been in stock many a sale would have been saved.

"Then again, in the wearing application to the first of instance, in the majority of cases after one, two or even three lots of goods have been sent on approval to be tried on at the home, the party to be fitted has to come to the store to be fitted in the end, and right here I might say that in many cases when goods are chosen from those sent to the house, that had the customer been fitted at the store a better fit and more satisfactory garment would be a single for a ship scarge, though fortunately not so great a ship scarge, though fortunately not so great a sin the opening of navigation and Nove Dolong the showing was to commerce the port of the same period last year.

The sallions were insured by the say that in many cases when goods are chosen from the opening of navigation to the first of November this year amounted to 6,694,000 as compared with 14,330,00

for one number of the general opinion is that the fire was of incendiary origin.

Considerable lea formed in the riv.

Considerable lea formed in the riv.

Considerable lea formed in the riv.

The three is always the fact to contend while leading the result.

Winnipeg, Man. Nov. 10:—(Special)
—At last night's session of the Presbyterian Synod for Manitoba and
the Territories Rep. Dr. Warden,general agent of the church in Canada,
and finance minister for the Presbyterian denomination, scored the presbyteries composing the synod for
their meagre contributions to the
Home Mission work of the church.
By the use of figures showing missionary contributions from all parts
of Canada, Doctor Warden conclusvively proved that in spite of the
growing prosperity of the west, western presbyteries were not doing
their part in anything like a satisfactory manner, in subscribing funds
for the maintenance of Home Missions.
