At a conference on Oct. 11, at Ottawa, this matter of a temporary choice of leader would probably receive final treatment. In the meantime the Conservative party would weigh well the capabilities of men mentioned. In the summer there will be a grand rally of the whole Conservative party from coast to coast. At this gathering some decision will have been arrived at that will bring about the appointment of a Dominion leader.

act gives or compels the assessors to capitalize income from leased land and tax the principal 3.36, which simply means that the owner of the land has to be satisfied with a 2.64 income while the city takes the 3.36, and often the owner does not get 2.64, as sometimes the capitalization of the land at six per cent. brings it to a higher price than the owner can realize, but the For example: A certain owner has a piece of land he will sell for \$4,000, (is trying now), but the city values it at \$5,200, stopping the sale of it and collecting 3.36 on \$1,200 more than the land is really worth. This is not an extreme case. There are many even

worse.

For twelve or fifteen years real estate has been suffering under this handicap and nothing but a new act will help. The framing of this act should not be entirely in the hands of the Board of Trade, which only last year compelled the commissioners to take off wharfage on the docks amounting to about \$27,000 with no more shipping coming into port. This mistake should be rectified at once.
