### POOR DOCUMENT

THE EVENING TIMES AND STAR, ST. JOHN, N. B., FRIDAY, MAY 20, 1921. March 26, 1811, it was in sight for seventeen months. Its tail was estimated to have been 100,000,000 miles in length with a breadth of 15,000,000 miles.

The results of the second of have been 100,000,000 miles in length with a breadth of 15,000,000 miles.

Every visit the comet makes approaching nearer our sun, it leaves some of its tail behind, diminishing its volume. As a comet approaches the sun its shrinks in proportion.

Winnecke, or Pons-Winneck, as our June visitor is called after two astronomers who discovered it and re-discovered it on two different occasions, visits us every five years and eight months. Cc.npared to the other distant relatives who drop in every thousand years or so, Winnecke, one might say, calls in every other day. The last time he passed by morning in the office of the county sector to the distant relatives was was inprogress Bolshevism was unknown and wood alcohol was only being used in hair tonics. It is not known yet how close the comet will come this time.

The Eclectic Club met last evening at the home of Hugh Bruce, Mount Pleas-ant. "Historical Spots in New Bruns-ant. "Historical Spots in New Bru LOCAL NEWS Read Bassen's ad on page 17.
