### EARTH IN RISKY FIX.

Detroit, June 25.—There are eight ways in which earth may come to an end, according to the Rev. George T. Gullen. For one thing it is travelling towards Hercules at the rate of 600,000 miles a day, and they may bump. Also it may collide with something else, may pass through the tail of a comet, causing asphyxiation, or the heat of the interior may give out. And there are several other possible disasters.
