AGRICULTURE Notes and Suggestions of Practi-cal Utility

E FARM, FIELD, GARDEY Interest for Many soils need lime. Begin small and work up.

Grow your own fence posts. Give your apple trees potash Red clover and corn fill the bill. Have you a soiling crop growing Light work makes a willing team The best is none too good to keep Quality should be first considered The farmer's gain is nobody's loss

Liberality is apt to beget liberality Variety of food increases the relish The best fruits are of native origin. A good farmer is usually a tidy one. Lime is said to destroy white grubs. Moderately work your breeding stock. All noxious weeds should be outlawed. Give the sitting hen a corner to herself. Thrifty shoats are always good property.

One degree into the mysteries

grown in a sandbank.

Soil should not be worked when it will stick to the polished hoe.

Two men, a boy and three horses make a good force for haymaking.

good force for haymaking. good force for haymaking.

Stir the soil in the garden when it is very carefully. The cave must be in good neither too wet nor too dry. The earlier grass is cut the warm milk is a good thing for the stom-better than Paul's wine.

The pasture is continually mowed, and the

the score crack and lose quality. The time they remain here is determined by the season and size of the cheese, the maker judging this for himself. The largest are usually kept from The pasture is continually mowed, and the rass continually grows. The farmer, as far as possible, should work washed with tepid water slightly salted, and

She-I don't think that is what makes He-What is it then? She (toying with her fan)—It is because hat method is so artificial.

rett Browning to a Boston visitor about his father, describes him as having been greatly amused at what an English friend had related to him on returning from a visit in Boston. He said he was stopping at one of the best hotels in the city, and, retiring early one night, found him-self unable to sleep, owing to mysterious doleful noises in a room near by. Calling a boy he immediately asked what was the cause of the disturbance. Oh, sah! oh, sah! that is the Browning Club just reading Browning, sah! That is all,

Few people have any idea of the care with which tobacco has to be attended after it is grown. It will imbibe odors of almost any kind if placed near the source of them. A pig sty for instance, near the place where the planter stores his crops will impart a disageeable flavor, which no care afterwards will divest it of. Among the many precautions taken to obtain a faultless leaf for the "Myrtle Navy" brand, is to ascertain carefully the methods which cares. ly the methods which every farmer adopts with his crops in the sections of Virginia where the "Myrtle Navy leaf is grown,
