Flexible Varnished Tubing  
Harvel Oil Stop

**IRVINGTON VARNISH & INSULATOR**  
COMPANY OF CANADA, LIMITED  
Hamilton, Ont.

Consumers of electrical power want uninterrupted service. Upon this depends their goodwill. This implies adequate protection of distribution systems against every hazard.

The warning given by records of thunderstorms is clear . . . Make sure of complete lightning protection from generator to meter. Westinghouse Lightning Arresters will protect against transformer failures and fuse outages, and will ensure uninterrupted service. Plan now to use

Westinghouse TYPE "LV" POROUS BLOCK AUTOVALVE ARRESTERS

- 1 Absolutely moisture-proof: every arrester is given a 10 pounds per sq. in. air test under water for 3 minutes.
- 2 Has a very low voltage ratio, assuring adequate protection for insulation.
- 3 Combination porcelain and soldered dropout clears the line in case of arrester destruction, on both large and small capacity systems.
- 4 It is so compact and light that it may be suspended from line conductors if desired.
- 5 Very large surge discharge capacity.
- 6 Proven entirely satisfactory by many thousand arrester-years' experience.
