

**- and old 314
is good for many
seasons more**

Drawing from photograph of F. Gasperich and his 30-60 OilPull

OUT on Gasperich's farm at Onida, South Dakota, old OilPull Number 314 is still "delivering the goods." Bought back in 1911, year after year she has given that kind of satisfaction that only an OilPull can give—and she is good for many years more.

As Gasperich, himself, tells the story—"For eight years now, number 314 has done the heavy work on this farm, cropping from 600 to 900 acres a year. We are just finishing breaking for the season, and the machine is working as good as when new, pulling eight breaking plows in dry sod.

"The reasons why we bought an OilPull in the first place were first, because it was a guaranteed oil-burner; second, on account of its strong, rigid construction; third, because of its actual power performance with a throttle-governed and smooth running motor. And I'll say right here that the machine has far surpassed all our expectations.

"We have pulled eight 14-inch breakers in dry bunch grass, with disk and drill behind. Parties here breaking the same kind of

ground have used as high as eight horses on a single breaking plow and got stuck at that, and have had to hitch on to the back of the plow to release it from the ground. You can figure it out for yourself—the OilPull has been pulling nearly an 80-horse load. No tractor of any kind around here has ever equalled it.

"As for cheap operation, nothing can touch our old OilPull. I have noticed that neighbors, who have so-called oil-burners, buy gasoline by the barrel. We buy a small can of gas once in a while just to use for starting when the engine is cold. Our repairs have been so few I have forgotten them."

This is but one chapter from the written records of OilPull performance that have proved the remarkable long life, dependability and economy that go with every OilPull. It is plain that the best basis upon which to choose a tractor is its performance over a period of years in the hands of owners.

You can get the OilPull in sizes from three to ten plows—there's a size to fit your farm. A postcard will bring you the OilPull Catalog.
