

"I'M STRONG ONCE MORE."

THIS is the way they feel, the men who had given up hope, who thought there was no cure for them, until they came upon Dr. McLaughlin's Electric Belt. Now they are full of life, overflowing with joyous spirits, and "Care to the winds." Pains are gone, weakness is gone, and full vigor is in every action.

Do you want to feel like that? Then wear this grand life-giving appliance for two months at night. It will charge every nerve with electric life, and you will feel like a two-year-old. It puts steam in your run-down body, drives away pain and renews youth.

"I am an enthusiast," you say. "Why should I not be? I have the gratitude of thousands of people who have been cured by my Electric Belt after the failure of the best physicians." I am enthusiastic because I know that I offer suffering humanity the surest cure for the least expenditure of money that is known to-day. I have gained my success by

learning how to treat my patients and then curing them. I understand the action of the current on the human system. My years of experience have taught me how to apply electricity. I charge nothing for my knowledge, knowing that it helps me. My patients are my friends. They are advertising my business.

With my Electric Belt I cure Rheumatism in its worst forms; I cure pains and aches, weak nerves, general debility, and any other trouble which can be cured by restoring strength.

I have not only proven that electricity is the substance of life and organic vitality, but I have perfected the best known appliance in the world for replenishing that force in the body when it is lost. My Electric Belt is the result of years of scientific study, coupled with experience and mechanical skill.

Now, dear reader, my strongest arguments are the large number of cures my Belt has to its credit.

Every man and woman who comes into my office gets a practical illustration of my method of cure, and goes away convinced that the claims I have made for it are TRUE. After seeing original letters from the cured (letters which I am permitted to exhibit) their doubts are expelled, and they know that my Electric Belt makes strong men out of weak men, gives buoyancy and ambition to the man who formerly got up tired every morning. They find that weak organs and atrophied parts are made as sound and strong as Nature intended. They read grateful letters from men and women who were cured by my Belt of Rheumatism, Backache, Lumbago, Sciatica, Stomach, Liver, Bowel, Kidney and Bladder troubles. They also see the evidence of wonderful cures of Locomotor Ataxia and some forms of paralysis. The following cures were made by

Dr. McLaughlin's Electric Belt.

MR. JAMES JOHNSTON, J.P., Ottawa, Ont., writes as follows: The Belt I purchased from you in August, 1903, cured me of heart disease, and I am able to work and attend to my business as well as ever, and my pulse is quite normal. I highly recommend your Belt for indigestion and all stomach troubles, from which I also suffered greatly. If your patients would pay attention to the advice you give them, they would not be long ailing.

F. W. NEWCOMBE, Box 366, Montreal, Que., says: I purchased a Belt from you last year, and am pleased to say it did all that was required.

MR. G. W. PRICE, Madoc, Ont., has this to say: As regards my health, I am improving every day, and I am not sorry I invested. My nerves are getting all right, and I am feeling much better every way, and the varicocele is decreasing.

JEROME SCANLON, Ancaster, Ont., writes: In one month's use of your Belt I have gained seven pounds. No bladder trouble, constipation or headache any more, and have developed a lot of muscle and strength. Thanks for your help.

T. J. SWEENEY, Care of Seaman's Institute, St. John, N.B., cured of weak back, varicocele and vital weakness.

ALEX. COULTER, Sault Ste. Marie, cured of stomach trouble.

N. C. RUSHOE, Loch Manor, Man., cured of weak back, kidney and stomach trouble.

JAMES BROWN, Hallville, Ont., cured of losses and stomach trouble, and finds life a pleasure.

J. D. RAESBACK, Vankleek Hill, Ont., cured of sciatic rheumatism.

NO CURE, NO PAY

is the offer I am making to any man who wishes to regain his strength and vitality. All I ask is security for the Belt while you wear it.

GOSSIP.

At an auction sale of Berkshire swine, on November 2nd, from the herd of Mr. Arthur Hiscox, at Motcombe, Dorsetshire, 45 head were sold for an average of \$52. The highest price was \$175, for an eight months' sow.

"Entering the American carriage horse domain in appreciable numbers in 1890," says a recent writer, "the English Hackney demonstrated its scope and purpose for stylish harness work and sensational exhibition to such an extent that the breed absolutely eclipsed all equine material it met here, so far as show-ring contests were concerned, for at least four seasons. Then occurred the relegation of the most phenomenal examples to the stock farms of their wealthy owners, and the gap left was immediately filled by

what we might term 'Hackneyized' trotting-bred horses, found amenable to the discipline of heavy-harness horse trainers. For several years, especially-prepared trotting-bred harness horses held sway, both in the market and show-ring. . . . During the last five or six years, however, the Hackney, shown mature, and in the hands of American experts, has once again forged its way to the front, and its average winnings before competent judges testify in a convincing manner to the breed's approachable adaptability for carriage purposes."

A North British farmer, writing to an Old Country exchange, says that the brindled cow Doctor, supposed to be a Guernsey grade, once a prominent winner in dairy tests, is still strong and well at 24 years of age, and giving 35 lbs. milk daily.

Many valuable horses are made very unpleasant to deal with because of the careless and it may be brutal use of the bit when the mouth is not accustomed to it.

With all breeds of horses, whether for draft purposes, riding, or driving, size is a great point to aim at, as it means that a better price may be obtained for a well-grown animal than for a small one. One of the surest means of increasing the size of a horse is to do well for it throughout its first winter. Any neglect or niggardliness in the matter of feeding during the first year of a colt's life results in stunted growth and a backward appearance. Therefore, horse breeders should see to it that the foal which is worth feeding at all should be fed well.

Mr. Shirley, Old Bletchley, England, at an auction sale last month of his non-pedigree dairy cows, realized for Maisie, a dairy show winner, and reserve to the pedigree cow Dorothy for three cups, the great price of 100 guineas, or \$520, by Mr. J. Madden, Lancashire. The average for thirty-six cows was £28 1s.; for thirty-six cows and seventeen bull calves accompanying them, £31 18s.

At an auction sale of Aberdeen-Angus cattle at Stuart, Iowa, last week, 41 head from the herd of J. E. Junk, brought an average price of \$178. The cow Blackcap 11th and heifer calf brought \$500. A two-year-old heifer sold for \$485, a three-year-old, with heifer calf, sold for \$460, and a yearling heifer for \$400.
