Deering New Ideal Binder

A Deering New Ideal binder will go into any grain field and cut, bind and deliver all the grain in that field. Any Eastern Canadian farmer can prove this statement to his full satisfaction by studying Deering binder features and trying the machine.

The reel is adjustable for tall, short, down or tangled grain. The special T-shape cutter bar enables the operator to tilt the platform close to the ground when necessary. The bottoms of the guards are almost level with the bottom of the platform, preventing trash being pushed in front of the knife.

Either smooth section or serrated knives can be used. Three packers and three discharge arms aid in doing efficient work. The main frame is made of tough, strong steel bars, forming a unit which the hardest usage can not twist out of shape. Then there is the famous Deering knoter—simple, accurate, unfailing.
