FOR BONDS and for INFORMATION ON BONDS WRITE TO WARDEN & FRANCIS, Confederation Life Bldg., Toronto.

Without Wasting Time

The engineering profession of Canada have before them a vast field of enterprise. The average engineer must keep pace with the developments of his profession. But he cannot afford to lose even five minutes. He must know what is going on in the engine-ering world. The paper which tells him all he wants to know is an acquisition; the paper which gives him the same information without wasting his time is the best of all.

The "Canadian Engineer" is THE journal of engineering in Canada. It is a monthly, Canada: It is a monthly, illustrated publication of 84 pages, same size as the "Monetary Times," and is published by the same proprietors at the corner of Church and Court Streets (opposite St. James' Cathedral). The following articles amongst others appear in the amongst others appear in the March number now ready:

The Foundry Core Room. By G. H. Wadsworth.

The Electric Furnace — its evolution, theory and practice. By Dr. Alfred Stansfield of Mc Gill University. Steady Floating Steel Foundations.

Britain's Opportunity for Canadian Iron and Steel Trade, Book Reviews.

Systems in Industrial Establishments. By A. J. Lavoie.

The proprietors of the "Canadian Engineer" are satisfied that the time has come when the engineering interests of Canada should be served by a Weekly Journal, and are issuing now a weekly edition of the "Canadian Engineer." The weekly edition of the "Canadian Engineer" gives all the news which the engineer desires. The reader may peruse the paper from one end to the other. Not a minute of his time will have been wasted. The news is live. And the possession of live news to the engineer means progress in his profession. Construction items are classified, and he can put his finger on just the thing he wants every time. The last issue contains, amongst other features, the following:

Industrial News. Notes of Markets. New Buildings.

Subscription rates: Monthly and Weekly editions, each \$1 per annum.
