One of the great difficulties to be got over when the Canadian Reciprocity Bill comes to be considered in congress will be the admissions of sugar duty free into Canada. There is little doubt that this will be insisted upon, and as little doubt that the conse-quent cheapness of the necessary article of consumption in question would be a great boon to the people of Canada. On the other hand it must be reco that the loss of the duties on sugar which form a large proportion of the revenue, amounting last year to £64,569 15s. 5d., will be a great obstacle on the

MUTUAL LIFE INSURANCE COMPANY Of New York, No. 35 Wall Street.

THIS COMPANY has now passed through its sixth year, and will soon present to the Public a statement its seventh.

From the great success attending this Institution since the commencement, many will undoubtedly be led to suppose that a lower rate of premium, and greater facili-ties in the shape of credits—will answer in its operations. This Company has placed to the credit of policy holders 52 per cent of the earned premiums paid by them, in con-formity with the requisition of its charter. This sum will be paid with the face of the policy to the holders at the time it shall become a claim on the Company, by reason of the death of the party on whose life it was issued, therbey proving most conclusively the value of the principles dopted-wiz: a Savings Institution. If then the rates of this Company are too high, it works

no injustice, for all participate in its profits, therefore it is just and equal in its operations. If the Carlisle table is prrect no less rates than those charged by this company would answer.
