

Of Course, it makes good Pastry

In fact, "Beaver" Flour is a special pastry flour. It contains the choicest Ontario fall wheat (the finest pastry wheat in the world) blended with western spring wheat to increase the strength.

BEAVER FLOUR

MILLED OF BLENDED WHEAT

makes the lightest, flakiest Pies and Tarts—the most inviting Cakes, Cookies and Doughnuts—and real homemade Bread, with the delicious, nutlike flavor.

There's no comparison between the tough Pastry and tasteless Bread, made with western wheat flour, and the "good things" made with "Beaver" Flour. Order some.

How To Avoid Spanish Influenza

Interesting Advice Given By Dr. G. G. Melvin Public Health Officer St. John

Dr. G. G. Melvin, of St. John gives the following methods of avoiding Spanish influenza which is prevalent in different parts of the Province and New England States.

It is caused by minute vegetable growths known generally as germs which find access to the breathing organs by way of the mouth and nose. These germs are not in general contracted from the free atmosphere.

In a word the disease is not borne by the air but by persons themselves. The affected person is most likely to spread the disease to those near him by coughing or sneezing. These actions expel very small—almost invisible particles of moisture from the air passages. These particles are known as droplets and are likely to carry the germ within or upon them. Coughing or sneezing there, fore should be carefully protected by the handkerchief and while the danger of this epidemic threatens, persons with a cough or specially likely to sneeze should avoid as much as possible public assemblies.

The onset of the disease is some, what sudden and acute. There is produced a very considerable fever and much discomfort of body in the way of pains in the back and limbs. The affected person should at once go to bed and not attempt to follow his usual occupation to "fight it off."

The course of the disease is generally short if it does not become complicated with severe bronchitis or pneumonia and by itself it is not often fatal. Medical assistance, however, should always be obtained as it is the very worst policy in this disease to attempt to cure oneself.

If the disease becomes prevalent people should abstain as much as possible from public assemblies of all sorts. It is the close contact one with another that does most to spread as is clearly evidenced from its wide spread prevalence already in army camps in the United States, on ship board and in other like connections.

Something also can be done to ward it off by spraying the nose and throat several times daily with a good but harmless antiseptic under medical direction. Although this is undoubtedly useful it should not be depended upon to the exclusion of the more efficient safeguard just referred to—the avoidance of crowds within enclosed spaces.

MILLBANK BOY KILLED

IN ACTION

Word has been received by Mrs. F. Petrie that her son Pte. Alex. Petrie a former member of the 55th Battalion was reported killed in action, Sept. 8th.

This is the second son who has made the supreme sacrifice. Thomas, as of a Western Battalion falling in the great Vimy Ridge Battle.

Besides his mother Pte. Petrie leaves to mourn his loss, John of Kilmord, Cyril of St. Isadore, James at home, and three sisters, Mrs. A. Leclair, Chelsea, Mrs. A. Bernard of Canaan and Miss Annie at home. Much sympathy is extended to the family their sad bereavement.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease greatly influenced by constitutional condition, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney Co., Toledo, Ohio is a constitutional remedy, is taken internally and acts thru the blood on the mucous surfaces of the system. One Hundred Dollars reward is offered for any case that Hall's Catarrh Cure fails to cure. Send for circulars and testimonials.

CROSS, SICK CHILDREN

Sickly babies—those who are cross and fretful; whose little stomach and bowels are out of order; who suffer from constipation, indigestion, colic or any other of the minor ills of little ones—can be promptly cured by Baby's Own Tablets. Concerning them Mrs. Jean Paradis, St. Bruno, Que., writes: "My baby was very ill and vomited all his food. He was cross and cried night and day and nothing helped him till I began using Baby's Own Tablets. They soon set him right and now he is a fat, healthy boy." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Covering capacity and Durability furnish the Correct Measure of Paint Cost

To arrive at true painting economy, you must base your calculations upon "how much will it cover" and "how long will it last"—rather than on "what is the price."

There is a certain retired merchant of a Western Ontario city who owns a Summer hotel in Muskoka. A friend asked him last Spring if he was contemplating repainting his hotel for this season.

"Well, no," was the reply. "I did think of giving it a coat because it is eight years since it was painted—but when I came to look it over, I found it unnecessary. You see, I used B.B. on that—so it looks almost as good as the day it was painted."

The B.B. he referred to is Brandram's Genuine B.B. White Lead.

This accurate report of an actual conversation is the strongest way we know of to emphasize the durability of Brandram's Genuine B.B. White Lead. As to its fineness, its whiteness, ask any painter of experience. They all know B.B. to be the pure article—absolutely unrivalled for covering capacity and durability—therefore, the lead to buy for true economy.

Demonstration Car Visits Newcastle

The demonstration car which is making a tour of the province under the auspices of the Canadian Forestry Association, was in Newcastle on Friday last. The car was equipped with all models of all models of all modern apparatus for forest protection and for fighting forest fires, including forest telephones, lookout towers, wireless, modern aeroplanes and a miniature showing a model forest.

The car from the time it entered the province at Campbellton until it leaves this week is in charge of Mr. Alfred Brewer, of the Provincial Forestry Department. Mr. D. R. P. Coates, of Montreal, is demonstrating the working of the marconi wireless in the Canadian forests.

As a result of the demonstration the Provincial Forestry Department may introduce the wireless system in connection with its new forest protection service, in place of the telephone system now in use. It is also expected in the near future, probably at the close of the war, to have an aeroplane service in the forestry department such as already exists in the province of Quebec. This scheme has been under way for some time.

A large number of citizens visited the demonstration car Tuesday.

SATURDAY MARKET

There was a large market at Fredericton on Saturday morning, and meat and produce were in abundance. Some of the best lamb offered for some time was on sale and soon picked up. Beef was selling by the carcass at 14 and 15 cents per pound; lamb \$1 to \$2.50 per quarter; veal fore quarter 14 and 15 cents and 20 and 22 cents for the hind quarters; pork 20 and 21 cents by the carcass; butter 45 cents per pound; eggs 55 cents per dozen; bees' honey 45 cents per pound; apples, \$2 and up; potatoes \$3 per barrel; corn 20 cents per dozen; cauliflower, 20 cents each; squash 3 cents and pumpkin 3 cents per pound; cabbage 5 cents a head; turnips \$1.25 per barrel.

With the Fingers! Says Corns Lift Out Without Any Pain

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply directly upon the corn a few drops of Freese's, says a Cincinnati authority.

It is claimed that at small cost one can get a quarter of an ounce of Freese's at any drug store, which is sufficient to rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and while sticky, dries the moment it is applied and does not inflame or even irritate the surrounding tissue. This announcement will interest many women here, for it is said that the present high-heel footwear is putting corns on practically every woman's foot.

Invaluable on the Farm—

Everjet Elastic Paint

A lustrous, black carbon paint that combines the qualities of cheapness and durability. Without an equal for use on metal, wood, rubber roofings and all exposed surfaces. It is a bituminous product and is elastic, adhesive; will not rub, peel or scale; will not become brittle and crack; is impervious to moisture; can be used in any climate; resists all action of acids, alkalis, gases, steam vapors, etc. All metal surfaces should be protected against rust with Everjet. Get a can to-day.
