Number of Interesting Reports Sub mitted by Officers of the Society

The regular meeting of the Children's Aid Society was held yesterday afternoon, when a large amimportant business was transacted. Mr. Hunt, returned dele- 1:56. gate to the international convention of charity organization societies, recently held in Toronto, submitted a report which was full of interest, and contained much information of value to the board. It dealt with many topics chief of which was one regarding child saving, and outlined many operations in this respect by societies both in Canada and the United States.

Mrs. Shaughnessy, a lady of fifty years of age, who has interested herself greatly in the work of the society, submitted a letter inclosing a number of applications for children in most desirable homes. Mrs. Shaughnessy, although of Catholic persuasion, does not confine her activities and efforts to those of her own faith, but has secured homes for several Protestant children in the neighborhood in which she lives. In all she has found homes for over a dozen children. She was the first white child born in the township of Arthur, and the 50 acres presented to her parents for her benefit, by the govern-ment, now forms part of the farm where the old homestead stands. A letter was read from Mr. Kelso, provincial superintendent of the society, complimenting the local society upon the active and intelligent efforts being made on behalf of neglected and abandoned children. The London society he considers figures prominently

Mrs. Harvey, lady visitor, submitted a report, regarding the children who have been placed out by the society, and visited by her. In every instance the report confirms the action of the society as to the character of homes selected. The children are all healand are well looked after. The case of a young lad in an adjoining township, who had been placed out by the society and ill-treated, was taken up, and the inspector ordered to make further in-

with and passed upon. So great has been the success of the potato patch scheme that next year the 1014 miles. society intends to go into it on a much larger scale.

Speaking of the gold fever on the coast, Mr. Darch says: "Everybody is talking of the Klondike out there, and many are so carried away with "Story of an African Crisis and of the excitement that they are leaving good jobs for the gold fields.
