CRERAR INSISTS THAT TARIFF IS NOT VITAL ISSUE

Opens Ontario Campaign, Cnallenging Tories To Bare Source of Funds.

NOT TO "SCRAP" TARIFF!

Goal Is Elimination of Protection Principle, He Declares.

BRAMPTON. Ont., Oct. 17. - The ssue, emphatically declared Hon. T. A. Crerar, leader of the National Progressive party, opening his Ontario tampaign here tonight, is not a straight issue between protection and free trade. "That issue exists nowhere except in the imagination of those who want to

create a wrong impression."

Progressives argued that the basis on which the Canadian tariff rests should be changed. "But we are not koing to wipe the tariff out," he added. "Don't be afraid of that. We have our

When the chairman called Mr. Crerar's name the crowd rose en masse, singing "O, Canada." In the course of his speech Mr. Crerar passed over ground made familiar by his manifesto, intimating that at further Ontario intimating that at further Ontario meetings he would take occasion to develop his argument. He pressed the point that the Government had so far failed to reply to his Brandon challenge to give the source of their campaign funds. "I repeat," he insisted, "Where is the money coming from?"

Whirlwind Campaign.

Mr. Doherty predicted a whirlwind campaign in Ontario to stampede farmers into voting against their own party. Thousands upon thousands of dollars would be spent. "Tell me," exclaimed Mr. Doherty, "who is paying the shot and I will tell who will run the country if the Government wins."

Hon. E. C. Drury, premier of On-

"That," said Mr. Crerar, "is the sort of thing we want to get away from in our system of government."

The prime minister claimed that the tariff was the only issue before the people. "I am ready to discuss the tariff at any time." Mr. Crerar proceeded, "but it is not the only issue. There remains the vital issue whether the Government shall be free from corrupting influences that have operated on it in the past."

Hon. E. C. Drury, premier of Ontario, said never had any movement been so maligned as the Progressive movement. How Teeth Show!

White or dingy—how conspicuous they are Remove the cloudy film

There is a way to keep teeth whiter, cleaner, safer. Millions now employ it.

The glistening teeth you see everywhere now largely result from this method.

This is to explain that method. To tell you why authorities advise it. Then to offer you a ten-day test and urge that you accept it.

The film discolors

Your teeth are coated with a viscous film. You can feel it with your tongue. It is ever-present, ever-forming. It clings to teeth, enters crevices and stays.

The ordinary tooth paste does not end that film. The tooth brush, used in old ways, leaves much of it intact. So very few have escaped the damage which that film creates.

That film-coat absorbs stains, making the teeth look dingy. Countless facial attractions are marred in that way. Combat that film for a little while and see how your teeth improve.

How teeth are ruined

That film is now known as the cause of most tooth troubles. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause

Two effective methods

Two effective methods have been found. Many careful tests have proved them. They have been combined in a dentifrice called Pepsodent.

Millions of people who have tried it now employ it daily. Leading dentists everywhere advise its use. In almost every circle, glistening teeth show its visible results. Every home is welcome to a ten-day

Other desired results

Pepsodent brings other effects which authorities desire.

It multiplies the salivary flow. That is Nature's great tooth-protecting agent. It multiplies the starch digestant in the saliva. That is Nature's agent for digesting starch deposits which may otherwise form acids.

It multiplies the alkalinity of the saliva. That is Nature's factor for neutralizing acids which cause tooth decay.

These results come from every application. They last for some time. And they give Nature much-needed aid in combating the possible effect of modern starchy diet on teeth.

Tooth pastes based on soap and chalk have the opposite effect. Modern au-
