OUR INDIAN TROUBLES.

Every day is bringing us nearer and nearer a general collision with the native tribes, and proving to us unmistakably the necessity with the Government, and more immediately the white. under its control. The account published by us yesterday of the cruise of the Devastatien along the western coast of the Island, shows the dangers into which we are. drifting. If we are to open up the interior, what he terms "a little arithmetical exerto penetrate the country in search of gold, coal, or other minerals, to increase our trade along the coast, or to develop our fisheries, it is very evident our relations with the Indians must be these of harmony and good feeling. If we go on blundaring as we have done in the past, without any system, leaving our inhabitants to be murdered in the outlying districts, or allowing the Indians in their turn to be made the victims, we shall most effectually close up every avenue to pub-lie or private enterprise beyond the settled districts, and deteriorate instead of increase

Of course it would not be fair to institute districts, and deteriorate instead of increase the value of our public lands as well as the property in our towns. We cannot en any ground afford to do this. The Island is small enough without having the interior and the seaboard closed up against us by a hostile feeling among the savages. Already the west coast is threatening to the trader and explorer. The late expedition of H. M. S. Devastation has developed a state of things that is positively alarming, and may, through an overstraining after peace on the part of our authorities, produce serious hostilities. The mission on which the war vessel was sent was certainly one which districts, and deteriorate instead of increase embraced within its contingencies the necessity of using force,-as does every mission that aims at arresting defiant aggressors of law; it was therefore clearly the duty of the authorities to see that the civil officers were backed up, even if force was extract. necessary, in the performance of that task they were engaged to execute. The war vessel has, however returned. after having submitted with exemplary patience to the derision of two hundred armed savages; and so far, the arrest of the Clayoquot murderers is still an unaccomplished fact.

armed barbarians will create a feeling, if Registrar has the power of cancelling the not crashed in the bud, of dangerous bravado amongst the Indies, tribes. Hitherto the gunboat was an object—indeed the only object—of wholesome terror. Let the Indians. owever, feel that they are safe from the ofower of a vessel of war, and we have an increase in those overt aim so serious a blow at the at of the country. We do not doubt know, wh that the authorities will follow the matter swiftly up; for the mischief in every imbrog ment of the necessary fees would form a necessary ingredient in the process of regislie with savages is delay. Better to panish on the spur of the moment, even if injustice is done to some, than to wait until every Indian or every tribe is infected with a disdain or contempt for our power. We are fast approaching a crisis when it will be shareholders for debts incurred.—En. Col. either an Indian war, or a retarded colonial growth, and we can afford neither. A war growth, and we can afford neither. A war by the Geelong Advertiser has having occur-with the Indian tribes would be our hopeless red in the Insolvent Court: "A Lady of someruin; for we have previously shown the principle laid down by the Imperial government in regard to the expenses in all such cases which are to be borne by the colonies. His Honor observed that as the culty with the natives in the neighboring insolvent was in the court, the application colony—reaching it is said as high as should be made by him personally. In vain the lady pleaded that the occurrence of the day had slightly overcome her better (?) half; dread of any similar or greater difficulties on the husband was called, and with difficulty Vancouver Island. It is with the view to made his way to the front of the Bench whe prevent such a catastrophe that we would looked for denouement, took place:—His urge upon the Government the necessity of losing no time in settling this murder questhe estate. His Honor: Could you not obtain hair of a red man's head should be hurt, if justice can be satisfied without it; but if blood Honor: How many children have you? Inmacy will step in to prevent its being shed.

The most fruitful source of all disasters as well as difficulties is ignorance, and if we were to trace the cause of most quarrels with savage races we should find that it had been a misunderstanding. In this expedition after Indian murderers, the lives of Mr. Smith and his companions were jeopardized, by the foolish if not culpable observations which the captain of a small craft had previously let fall among the Indians at Barcley Sound, to the effect that men of war were coming round to kill the native tribes. This the Indians implicitly believed, and were therefore bent on giving the whites a warm reception. We instance the fact to show how necessary it is te have a policy that will enable the natives creditors of Captain Moore will be held at to maintain, by agent or otherwise, a con- 3 p.m. to-day at the office of Messre. nection with the Government so as to preserve Pearkes & Green, when it is expected that them from the falsehoods and chicanery of terms will be acceded to by which the the white man, and to lead them gradually to Alexandra will be enabled to resume her understand that, while it is the determination | coasting trade once more.

of our authorities to see that justice is dealt out to them mest rigidly, it is at the same time their desire that full obedience should be yielded to the law. At the opening of the House His Excellency made this Indian question one of considerable prominence in his speech, so that we have good reasons for hoping that no time will be lost in adopting a system of Indian management that will relieve us, once and for all, of the outrages of inaugurating without delay a policy that which we are weekly publishing-now on will draw the Indian into closer connection the side of the Indian and then on the side of

The directors anticipate that in two seasons from the present time a crop of about 16,600 pounds of tea will be secured, and that when the whole of the estates are under cultivation the annual production will amount to 60,000 pounds. It is well known that Indian tea, owing to its strength, commands high prices in the London market.

Dr. Rae, who has just crossed the continent for the purpose of surveying a route for the intercolonial telegraph, arrived in this city last night by the Reliance. We also observed amongst the passengers Lieut. Stewart, R.N., and Mr. Thomas Cooper, of the Chilcoaten expedition.

The following notice appeared in Saturday's Gazette: COLONIAL SECRETARY'S OFFICE.

22d September, 1864. Whereas, by an Order in Council, bearing date the 11th June, 1863, constituting a Legislative Council, in and for the Colony of British Columbia, certain members of the said Legislative Council were appointed to represent the wishes of the inhabitants of the several districts of British Columbia, viz :- New Westminster, Douglas and Lilto grumble will donbtless feel mere content looet, Hope, Yale and Lytton, Cariboo East with their lot after reading the above pithy and Quesnelle Forks, Cariboo West and Quesnelle Mouth; and whereas the Instruments under which the several members were appointed as aforesaid will expire on the 31st day of December now next ensuing notice is hereby given that instructions have been issued to the magistrates of the before named districts, to call public meetings for the purpose of learning the wishes of the inhabitants with regard to the selection of members to serve in the Legislative Council after the date before mentioned. By command.

CHARLES GOOD, For the Colonial Secretary. The Gazette contains a notice to the effect that His Excellency the Governor will lay before the Legislature at its next session an.
Ordinance requiring that after the first of February next " all carts, or other vehicles, carrying goods, madise, &c., of 2,000 lbs. in weight at wards, over any wagon road in this must be provided with tires of not less four inches in width."

THE DISTURBANCES ON BOARD THE JOHN STEPHENSON.—We have been shown a diary kept by a passenger on board this vessel purporting to give full details of all that occurred on beard that ship during the passage from England to Valparaiso and thence to this port. An interesting account of the disturbances which took place on board could be framed from the diary in question, but inasmuch as it would involve charges of a serious nature against the men now on their trial for mutiny on the high reas it would hardly be an act of justice to publish it.

THE EARTHQUAKE.-We learn that the shock of the earthquake felt in this city on Monday morning last was experienced even more severely at Port Townsend. The whole population were aroused and some of them greatly alarmed, the houses being shaken violently. A heavy rumbling sound was also heard. As the violence of the shock seems to have increased the further south it was felt, it is not improbable that a future mail steamer may bring us news of some disaster from that cause in California or Central America.

THE JENNY JONES. - This vessel took a short trial trip outside the harbor yesterday morning with satisfactory results to her owner. She may probably, however, require new propeller, which if needed Messrs. Spratt & Kreimler can furnish her with in a week. She will proceed to Olympia this day from the Hudson Bay Company's wharf, and will return next Tuesday.

THE BREED OF HORSES.—A number of noblemen and gentlemen have resolved upon establishing what was much wanted in Ireland—an "association for breeding thorough bred sires." It is to be a joint stock concern, and its directors will include the Marquis of Downshire, the Marquis of Conyngham, the Rarl of Bessborough, Viscount St. Lawrence Captain Pack Beresford, M.P., and Mr. M Dunne, M.P.; the manager and hon, accretacy is to be Lord Naas, M.P. A capital of £20.

600 will be required to be raised in shares of ten pounds each.

"Madam," said a very polite traveler to a testy old landlady, "if I see proper to help myself to this milk is there any impropriety in it 1" "I don't know what you mean sir; but if you mean to insinuate that there is anything nasty in the milk, I'll give you to understand, sir, that you've struck the wrong house! There ain't a first hair in it, for as soon as Dorothy Ann told me that the cat was drawned in the milk I went straight and strained it over, sir."

Holloway's Ointment. Bad Legs, Ulcerous Sores, Bad Breasts

The Chilcoaten Indian prisoners will be tried in a week or ten days. The Columbian says the cost of the expedition to the colony already will exceed \$100,000.

The people of Yale and Lytton have held meetings for the purpose of sending an exploring expedition via Kamloops to Koot-Piles, Fistulas and Internal Inflammation.

Piles, Fistulas and Internat Amazana.

These distressing and weakening diseases may with certainty be cured by the sufferers themselves, if they will use Holloway's Ointment, and closely attend to the printed instructions. It should be well rubbed upon the neighboring parts, when all obnoxious matter will be removed. A poultice of bread and water may sometimes be applied at bed mead and water may sometimes be applied at bed me with advantage: the most scrupulous cleanli-sa must be observed. If those who read this ragraph will bring it under the notice of such of cir acquaintances whom it may concern, they will ndar a service that will never be forgatten, as a re is certain.

Rheumatism, Gout and Neuralgia. Nothing has the power of reducing inflammation and subduing pain in these complaints in the same legree as Holloway's cooling Ointment and purifying Pills. When used simultaneously they drive all inflammation and deprayities from the system, subdue and remove all enlargement of the joints, and leave the sinews and muscles lax and uncontracted. A cure may always be effected, even under the worst circumstances, if the use of these medicines be persevered in. ines be persevered in.

Eruptions, Scald Head, Ringworm, and other Skin Diseases.

After fomentation with warm water, the utmost relief and specifiest cure can be readily obtained in all complaints affecting the skin and joints, by the simultaneous use of the Ointment and Pills. But it must be remembered that nearly all skin disease simultaneous use of the Ointment and Pills. But it must be remembered that nearly all skin diseases indicate the depravity of the blood and derange-ment of the liver and stomach; consequently in many cases time is required to purify the blood' which will be effected by a judicious use of the Pills. The general health will readily be improved, al-though the cruption may be driven out more freely than before, and which should be promoted; per-severance is necessary. verance is necessary.

On the appearance of any of these maladies the Cintment should be rubbed at least three times a day upon the neck and upper part of the chest, so as to penetrate to the glands, as salt is forced into meat; this course will at once remove inflammation and ulceration. The worst cases will yield to this treatment by following the printed directions Scrofula, or King's Evil, and Swelling of the Glands,

This class of cases may be cured by Holloway's This class or cases may be cured by Holloway's purifying Pills and Ointment, as their double action of purifying the blood and strengthening the system renders them more suitable than any other remedy for all complaints of a scroinlous nature. As the blood is impure, the liver stomach and bowels being much deranged, require purifying medicine to bring about a cure.

L., (ex-Army Medical Staff,) the recipe of which was confided solely to J. T. Davenport, 33 Great Russell street, Bloomsbury square, London (Pharmaceutical Chemist). The medical testimony of civil, hospital, military and naval practitioners pronounces it invaluable.
