The Honorable Daniel Webster is now i England, where he is well received in the high, esteire les. He la doubtless a great man, bu like other distinguished orators who talk much and in opposite places, he should be gitted with memory and accurate discernment, or he may possibly subject himself to the charge of incon listency. Now in Congress last winter, whe the subject of the north eastern boundary line was in discussion before the Senate, Mr. W. in the exuberance of his petitiotic zeal made use of language like the following-the spirit of it is still vivid in out recollection.

" It was the duty of Government to have the line run and if it were left to him, he would have it done was settled."

Now in England-presto-the scene is chan ged, our readers will perceive by the followingextracts from Mr. Webster's speech, at a large Agricultural meeting held at Oxford on the 13th waited till he saw them all fairly ! July last; Earl Spenter in the chai. :-

We recollect that several of the American Administration prints at the fine were not back ward with attributing Mr. Was language in the Senate to the influence of the Jolly god.
