

the regulations enacted hereunder are fully complied with, and to take samples of milk for examination and testing.

(3) Every such inspector shall have the right of entrance to the premises, no matter where located, of every person producing milk for sale or consumption within the municipality for which he is inspector, of fully inspecting the same, and of taking for examination and having tested samples of milk produced therein and of the water supplied to cows or used in cleansing dairy utensils.

(4) Every such inspector shall have the right to inspect and to take samples of milk for sale or consumption within the municipality for which he is inspector while in transit, and shall have the right of entrance to any premises in order to procure samples of such milk.

(5) The result of all said tests shall be open to public inspection at all reasonable times, and may be published by the medical health officer of the municipality if he so desires.

7. No milk shall be sold from any cow which, upon physical examination by a duly qualified veterinary surgeon, shall be declared to be suffering from tuberculosis of the udder or milk glands, or whose milk, upon bacteriological or microscopic analysis, is shown to contain tubercle bacilli, or which is known to be suffering from splenic fever or anthrax, or any other general or local disease which is liable to render milk from such cow a menace to the public health. Where any doubt arises as to any cow being affected with any of the diseases above mentioned, it shall be the duty of the inspector to notify the owner that the milk of such cow must not be sold or offered for sale until a permit so to do has been granted by the board of health of the municipality in which such milk is being consumed; and, upon such notice being given, no milk from such cow shall be sold until said permit has been granted.

8. No person suffering from or who has knowingly within a time prescribed by the regulations of the Provincial Board of Health been exposed to diphtheria, scarlet fever, typhoid fever, erysipelas, smallpox, anthrax, or venereal disease, or any infectious skin disease, shall work or assist in the production, transportation, or vending of milk, and no proprietor, manager, or superintendent of any dairy or dairy farm shall knowingly permit any person suffering or exposed as aforesaid, to work or assist in the production, transportation, or vending of milk, and the sale of milk produced or handled under such circumstances may be forthwith prohibited by the inspector.

9. No cans, bottles, or other utensils used in the distribution of milk shall be used for any other purpose whatsoever, and all such cans, bottles, and other utensils must be thoroughly cleansed before again being used.
