### COLORED STUDENTS IN MONTREAL.

The Montreal Maternity Hospital has closed its doors to colored students, and as a result the medical faculty of McGill University has been compelled to inform all intending colored medical students that it cannot guarantee to graduate them. The diploma of McGill cannot be given by the University unless the full course is carried out, and this includes the carrying out of twenty maternity clinical cases by each student at the end of their fourth and during their fifth year. For many years this clinical work has been taken in the maternity hospital, but the white patients object to being treated by colored students.

Dr. W. W. Chipman, head physician of the maternity hospital, will try to make arrangements for the colored students to get their clinical work in New York.
