

THE BEST KIND OF AGENT

A Trust Company can do anything for you that an agent can do. It can manage your estate, collect your rents, pay your taxes, keep up your insurance, and generally assume all the responsibility of management.

It will collect interest on mortgages, coupons on bonds and debentures and dividends on stock, and will pay over all sums so collected, in any manner that may be desired.

Business men about to go abroad or take a vacation, and ladies who feel unequal to the task of looking after real estate or attending to investments, can find no more efficient agent than a reliable, well-managed Trust Company.

NATIONAL TRUST CO. LIMITED

Many Merchants

Wisely let no opportunity pass to show they are in the right procession for doing business by using sensible letterheads and correct mercantile stationery, such goods as our famous

Hercules Bond, Regal Bond, Security Trust Bond, White Wove Meadowvale, or Holyoke Superfine with Envelopes to match either of these lines.

Take a thought about the splendid issue of sending out first-class stationery and insist upon your stationer furnishing you with our Special Water Marked Papers. If he does not handle them we will supply you at lowest quotations.

THE B/FBER & ELLIS CO., LTD.
Manufacturing and Wholesale Stationers, Toronto.

LIGHTNING MOST DANGEROUS IN THE COUNTRY.

People are afraid of lightning, perhaps to an extent disproportioned to its disastrous effects on human life. The Weather Bureau of the United States has been collecting statistics as to persons killed and property burned by lightning stroke. According to these, 312 inhabitants of that country, on an average, are struck by lightning each year. Twenty-five hundred were struck during the last nine years. Farmers suffered most, probably because of their exposed occupation, for the danger from lightning is found to be four times as great in the country as in the cities. January naturally is the least dangerous month, and July is the most dangerous—123 persons were killed in July, 1893. During the eight years ending with 1897, 7,558 buildings, valued at \$17,672,772, were destroyed in the United States by lightning; 4,891 of these were barns. Comparatively few churches were struck. In 1898 buildings valued at \$1,441,880 were destroyed. New York State headed the list with 395. There were no disastrous strokes in Idaho, Arizona, California, Oregon, Nevada, or Utah.

It will be observed that almost two-thirds of the buildings struck were barns. Lightning is attracted towards them because after harvest their contents of hay or grain cause a vapor to arise which serves as a sort of conduit for the electric fluid. Better ventilation would, in a measure, cure this. In the same year 1,842 animals, valued at \$48,000, were killed in the United States by 710 strokes of lightning. This mortality was unequally divided among cattle, horses, mules, pigs and sheep, whole flocks of the latter being killed by single volts. There is no means of finding out the exact number of trees struck, but it is interesting to learn that the list of liability is headed by the oaks. Firs, beeches, pines, larches, ash, and birch trees are most liable to be struck in the order named, on account of their conducting qualities.

As a result of the visit of Mr. B. C. Webber, Dominion inspector of meteorological survey service, a meteorological station is to be established at Dawson City, which will much facilitate the compiling of reports for the Pacific Coast.

The dry goods business of The Pater-son Co., Belleville, has been operated for a number of years with very little success. There have been several failures in their mercantile career, the last of which was in January, 1900, when their liabilities amounted to \$8,600. There was a sale of the stock which brought 50 cents on the dollar. Since that time they have started up in the general store business with no success, and now we hear of their having assigned.—With very little means and a knowledge of the tailoring trade W. H. Morris began in that line in April, 1898, at Waterford. He met with strong competition and has been forced to make an assignment. Assets reach \$1,100, against liabilities upwards of \$1,300.
