Dow Fraser Trust Co.

122 HASTINGS STREET WEST
McKAY STATION, BURNABY

Safety Economy

WHEN planning a factory, be sure to consider the cost of probable accidents to employees, if you intend using countershafts and belts.

With the individual electric drive, accidents will be cut down to a minimum and your expenses for damage claims eliminated.

This is only one of the many features about the economy of electric power. The friction of belts and shafting consumes a large amount of power. No skilled engineer is required to operate the electrically driven plant. Power is used only when and where it is required.
