

- ² Material not irradiated in a reactor or material irradiated in a reactor but with a radiation level equal to or less than 100 rad/hour at one metre unshielded.
 - ³ Quantities not falling in Category III and natural uranium, depleted uranium and thorium should be protected in accordance with prudent management practice.
 - ⁴ Although this level of protection is recommended, it would be open to the Parties, upon evaluation of the specific circumstances, to assign a different category of physical protection.
 - ⁵ Other fuel which by virtue of its original fissile material content is classified as Category I or II before irradiation may be reduced one category level while the radiation level from the fuel exceeds 100 rad/hour at one metre unshielded.
-
