

February 12th, 1927.

Dr. F. G. Pedley,
Department of Public Health,
Columbia University,
New York City.

Dear Dr. Pedley:-

We have at last completed our arrangements in connection with Industrial Medicine.

I am glad to be able to tell you that the Montreal General Hospital have notified us of their willingness to institute an Industrial Clinic along the lines and under the conditions suggested by you in your letter to Dr. Martin on this subject. McGill University is equally prepared to cooperate in this work and appoint a lecturer on Industrial Medicine - a position which I would like now, officially, to offer you. The salary therefor will be \$5,000. a year, and the teaching in connection with this department will be under the auspices of the Department of Public Health and Preventive Medicine in our Medical Faculty.

I am pleased to be able to add that the Department of Chemistry in the University has expressed its willingness to assist in every way. With our new laboratories for industrial research the field should be wide open for excellent work.
