

COURSE OF ENGLISH READING.

A Course of English Reading, adapted to every Taste and Capacity, with Anecdotes of Men of Genius. By Rev. J. Pycroft. With corrections and additions, by J. G. Cagwell, Esq. 1 vol. 12mo. Price 75 cents.

"It is rare to meet with a work so well fitted to aid in the acquisition of knowledge as this; indeed, we have never seen any similar directory to an English reader, that seemed to us to compare with it, either in respect to its fortunate arrangement or general felicity of execution. We would recommend to every young person who intends to give any attention to the culture of his mind, to keep this book by him as a constant guide; and persons of any age or any profession, will find it as a book of reference quite invaluable."—*Albany Religious Spectator*.

"This book is eminently fitted to be both popular and useful. For want of some such guide as this, a large part of the reading, particularly of young persons, is to little purpose; and many who deservedly acquire the character of great readers, really acquire very little as the fruit of their reading. The present work will not only relieve the mind that is doubtful what course of reading to adopt, or that has been unable to find any satisfactory course marked out, but it will contribute to arrange and systematize the mind's acquisitions, so that they shall be at command whenever they are needed. It will be found an admirable work of reference, not only for students in the course of their education, but for professional men, and for all who wish to know what the greatest and best minds have thought on the most important subjects."—*Albany Argus*.

"This work is designed to enable the student to select such works as will most rapidly advance his knowledge of any particular branch or subject of literature, the arts, &c. It may be profitably consulted by all who desire to have their studies directed by mature judgment and experience."—*Baltimore American*.

"There is a vast deal of time spent to little purpose by almost every person who is given much to reading, from an inability to make a suitable selection of books. The present work is designed and admirably adapted to remedy this evil, and the course of reading which it marks out, seems to us altogether the most judicious that we have ever met with. It not only gives the names of the most distinguished authors in the various departments of learning, but furnishes hints by which the reader may judge of their comparative merits. To the professional man, as well as to the student, the work will be invaluable."—*Daily Amer. Citizen*.

"A volume which we can conscientiously recommend as marking out an accurate course of historical and general reading, from which a vast acquisition of sound knowledge must result. The arrangements and system are no less admirable than the selection of authors pointed out for study."—*Literary Gazette*.

"We do not know of a better index than this well-considered little book to a general course of reading. It might, as such, be safely and advantageously put into the hands of all young persons who have finished their education, and are about to take their place in society, or to begin the world."—*Atlas*.

"This course is admirably adapted to promote a really intellectual study of history, philosophy, and the belles-lettres, as distinguished from that mere accumulation of words and dates in the memory, which passes for education."—*Critic*.

"A most admirable and simply-arranged work, fit to be placed in the hands of every young man about to enter on a course of English Reading. It may be profitable, in truth, to every one; while the lively anecdotes intermixed with the subject-matter, render it full of interest and amusement."—*Aristidean*.
