"If we are not allowed to equip-our factories and workshops with adequate labor to supply our armies, because we must not transgress regulations appli-cable to normal conditions: if practices are maintained which restrict the output of essential war material; if the nation hesitates when the need is clear to take the necessary steps to call forth its manhesitates when the need is clear to take the necessary steps to call forth its man-hood to defend its honor and existence; if vital decisions are postponed until too late; if we neglect to make ready for all grobable eventualities; if, in fact, we give ground for the accusation that we are sloughing into disaster as if we were walking along the ordinary paths of peace without an enemy in sight, then I can see no hope.

"But, if we sacrifice all we own and all we like for our native land, and if our preparations are marked by grim resolu-tion and prompt readiness in every sphere then victory is assured."
