

MINING IN KALADAR.

The Guinea Property Makes a Good Showing and it will be Worked in Six Months' Time.

Napanees Star.
Since the Klondike gold excitement the fact that exceedingly rich gold fields lie almost at our own doors seems to have dropped out of sight. Recent facts which have come to light will certainly have the effect of re-awakening interest. It will be remembered that some months ago Mr. Shannon, a mining engineer having extensive mining interests in the Western States, while on a visit to Buffalo, was induced to make a survey of mining property in this district. While in Napanees, Mr. Shannon became acquainted with the owners of the Golden Pledge, or Guinea mine. On looking over the property, Mr. Shannon was so pleased with the prospect that he bonded the mine. Systematic work was at once begun in prospecting and developing, a shaft 25 feet deep being sunk and cross cuts being made at different points on the ledge for over 800 feet. The ore has been tested by such reliable assayers as Lickett & Banks of New York, and Balback of New Jersey, each test resulting in a satisfactory result. In fact the work has proceeded so far with such good results that the property should no longer be called a prospect, but a mine. In six months a complete plant will be on the ground and in operation, the capitalists behind the enterprise having full confidence in the result. While in town Mr. Shannon informed us that the only reason why mining operations in Ontario had not been more successful in the past was that the gold in the rock was so finely divided that by the old method a great deal of it could not be extracted. By the recently-discovered bromo-cyanide process the same ore will prove very remunerative, it being possible to mine the free milling ore, which prevails throughout the district, at a profit if it contains \$1 per ton in gold.

It is the conviction of Mr. Shannon that within a very few years this section of Ontario will rank as one of the richest gold fields in the world.

A Visitor From the Old Sed.
Robert Lang of Larbert, Stirlingshire, Scotland, a prominent miller from that country, was interviewed by a World reporter yesterday on the Exhibition grounds. Mr. Lang has been paying an extended visit to the northern and western counties of Ontario, and is more than pleased with this grand country, as he termed it. He says our Exhibition is away ahead of anything he ever saw in the Old Land, or any place else. He also said Montreal's exhibition was not so good as this one.

Mr. Lang also stated that since our flour had been shipped in such large quantities to Great Britain, their mills had been closed, as they could not compete in price or quality.

When at lunch at any first-class restaurant, ask for Fabst's Lager. You are sure to get it. 240.

E. S. Gunboat Ben Ashore.
New York, Sept. 6.—A despatch to The Herald from Mexico City, which has been stationed in these waters for some time, says that a gunboat was during a heavy wind, just what danger was being done to the gunboat is not as yet known, but an examination is now being made.

ONS IN PHRENOLOGY, EXAMINATIONS oral or written. French language. Mrs. Mendon, 300 Ontario.

Japan Has Made No Proposal.
York, Sept. 6.—A despatch to Herald from Panama says: Jose Rodriguez, Minister of the Republic of Central America to United States, who is now in Genoa, has called the attention of the United States to the fact that the Diet of the Nicaragua canal project.

The Herald: You may positively to Japan has made no over in reference to a canal concession. Jose Dolores Rodriguez, representative in Nicaragua, telegraphs that it is officially ascertained that the report of Japan's intentions with the Diet originated from Minister from Nicaragua, who started the report against President Zelaya.

What in France.
Sept. 6.—The Minister of Commerce, Boucher, addressing an agricultural meeting here to-day, said that the Government had not decided that it always maintain a customs barrier against foreign goods, even if the goods are of French origin, but the Ministry wished to favor French producers and to prove that the supply of wheat was adequate.

Give Him His Batteries.

Personal Profit Brings Buyers... To This Store..

There is nothing peculiarly wonderful in it—simply a logical out-working of cause and effect that gives us a trade supremacy—a business leadership that cannot be discounted.

"Here is an enormous store, covering over thirty thousand feet of ground, and of seven stories, within the precincts of which can be found almost everything that human need can require. It is a store that combines under one roof almost every article that is necessary for the practical needs of all the requirements of everybody, and it is because of this that the Robert Simpson Co. have achieved their present success and attained a position second perhaps to none in the retail trade of this country."—Globe.

We are anxious, as a matter of individual interest, and as a contribution to commercial history, that the tens of thousands of visitors who will be in Toronto for the next few days shall see with their own eyes just what sort of a store this is, how completely it is built for public service, and how thoroughly it saves money for everyone. Seeing will be believing.

New Dress Goods—None Others.

The old has vanished. We are ready with absolutely new up-to-date goods—fashionable, light, medium and heavy weight fall dress fabrics, and at prices that we know are not matched anywhere.
