"Chinese dogs are taught to subsist upon boiled rice with a little milk, and become so placid that they will not even bark," says Dr. Oswald.

Grape-Nuts was placed on the market for the use of brain workers. It is a concentrated nourishing food, containing in its make up minute particles of phosphate of potash obtained from the field grains. This, when combined as nature combines it in the human body with albumen, makes the gray matter of the brain and the nerve centres; therefore, the use of Grape-Nuts supplies the brain worker with steady renewal of the daily losses from his employment. Grape-Nuts do build brains, as can be demonstrated by 10 days' or two weeks' use. There comes a steady, sturdy feeling of independence and strength.

The question of the day, and the individuals who give this question their care and attention will become best fitted to make a success of life. Grocers sell Grape-Nuts food.

The publishers have disappointed us, and we have to disappoint our subscribers. To introduce this great work we made the price marvellously low, the result being that now we are
