Shaft Pumped Drys The old Silver Leaf shaft, 92 feet depth, has been pumped dry and drifting is being done on a stringer, the management feeling confident that

gation has opened up on the Montreal River, and prospectors are assured of clear route to Gowganda, it might s opportune to mention that it is not

Up There) .- At about half-past 9 last night the heart of Elk Lake gladdened, and the people went wild with delight. The night air was filled with cheers, guns were fired, and bonfires lighted. All this was done in honor of the arrival of the

was done in honor of the arrival of the first steamer of the Upper Ontario Steam-The steamer's siren was heard here long before her lights hove in sight, and those who had heard the welcome signal

those who had heard the welcome signal before immediately knew what was com-ing. The good news spread like wildfire, and in 15 minutes every resident of Elk Lake was down at the water's edge, showing how much they appreciated the fact that Elk Lake was no longer shut off from the outside world, and that the break-up season was at an end

off from the outside world, and that the break-up season was at an end. The boat, while comparatively small, is a large one for these northern waters, and she brought with her about 50 pas-sengers and considerable freight. The large bonfire which lighted up the dock enabled The World man to get a fair enabled The World man to get a fair view of the passengers as they disem-barked. It was an interesting sight. All were glad to be arrivals on the "first boat." There were old and young, griz-zled prospectors who have spent years in the woods, and young tenderfeet, intend-ing to make their first attempt to dis-cover the earth's treasure. Some came cover the earth's treasure. Some came wearing the garb of the city, white col-lar and stiff hat, evidently intending to

in lar and stiff hat, evidently intending to become business or professional men of Elik Lake or Gowganda. The purser on the steamer was a pretty busy man, but The World managed to get a few minutes with him. Commenc-ing to-day there will be a regular ser-vice from Latchford; trains will be met every day and travelers will have no un 25, Operations have now been commenc-ed at the La Rose, whereby crosscut-

ting will be done under the T. & N.O., permission having recently been grant-ed by the railroad. This means that the La Rose hold-ings on the town side of the track will be worked, previous to this noth-ing having been done. **Pan Silver Operations.** Superintendent McCollum of the Pan Silver has accomplished 1000 feet of drifting on the shores of Brady Lake. The shaft is down 180 feet and before
