

## Medical Report.

---

*To the Directors of the Deaf and Dumb School at Fredericton,  
N. B.*

GENTLEMEN :

I have the honor to again forward you my annual medical report.

In February, A. D. 1890, one of the pupils had a rather serious case of abscess of the leg, which was attended with much pain and a loss of about five weeks school time to the patient.

In December last a case of Diphtheria developed, but owing to the facilities at our command for the suppression of dangerous and infectious diseases, the contagion did not spread. This was the cause of this pupil being out of the schoolroom for about four or five weeks.

The above are the only cases of sickness of much importance. The usual colds, coughs and minor accidents have been about what would be expected in such an Institution, inhabited by persons of the age of such pupils, and we are happy to be able to state that at this, the close of another year, we are found with our ranks unbroken by death loss.

I have the honor to be, gentlemen,

Your obedient servant,

T. CLOWES BROWN.
