KILLED BY FALL OF COAL IN MINE

New Glasgow, N. S., Sept. 15.—John Thomas Gaskill, aged 52, was instantly killed when struck by a fall of coal in Albion mine this afternoon. He is survived by a wife and one daughter, Mrs. James MacKenzie, Stellarton, N. S.

Operations at Cape Cod canal for 1923 resulted in a net surplus of \$278,460.

NEW CLASS OF PROBATIONERS.

The new class of probationers at the General Public Hospital admitted this month consists of the following: Misses Margaret Barnes, of Bridgetown, N. S.; Christina Shand, St. John; Lucy McIntosh, Woodstock; Mary Mowry, St. John; Hazel Reicker, St. John; Lucy Henderson, New Glasgow; Beale Rayworth, Fort Elgin; Ruth Coe, Kingston, N. B.; and Sussana Hartley, St. John. One nurse, Miss

Harriet McIntosh, was graduated from the hospital this week.

INDIGESTION

causes bloating—gassy pains that crowd the heart—constipation. Always find relief and comfort in **CHAMBERLAIN'S TABLETS**. No gripping—no nausea—only 25c.

CAPACITY CROWD AT LECTURE

It is estimated that between 800 and 900 people heard the address of Edward Lee Hawk, character analyst, which he gave in the Pythian Castle last night. The building was taxed to the utmost of its capacity. Two policemen were on duty in the hall throughout the evening and cleared the aisles in order to comply with regulations. It is estimated that 150 people who had

gained access were turned out because of overcrowding and that about 600 people in all endeavored to hear the address and were not able to do so.

Mr. Hawk spoke on the characteristics of "Blondes, Brunettes and Red Heads."

were made for holding a tea and sale early in November.

PLAN TEA AND SALE. Moulson Temple Pythian Sisters held its regular meeting last night with Mrs. D. Porter, M. E. C., in the chair. Plans

OBSERVES BIRTHDAY.

Today a host of friends will wish Major C. G. Pincombe many happy returns of his birthday, he having been born in Bristol, England, on Sept. 16, 1864.

He has a long and honorable record of services to his credit, viz., Egyptian War, in which he was severely wounded; Soudanese campaign for the relief of General Gordon; South African

War, and the Great War, in which his eldest three sons also served. The Major is the proud possessor of eight military decorations; also the "Award of Merit" and several decorations from the Royal Army Temperance Association of the British army for valuable services rendered the cause.

More than a million U. S. children are doing hard labor, eight or ten hours a day, every day.

Let us Cut It Open and See how Snyder's Guaranteed Mothproof Furniture is Made

Don't Buy unless you see this Guarantee Tag attached.

HERE'S a good, typical Sani-Bilt Chesterfield of the best grade, from one of Snyder's famous guaranteed mothproof suites. It looks like a handsome, solid piece of furniture, judging by the outside, beautifully upholstered, Marshall Cushioned, soft, springy and luxuriously comfortable. And you see by the tag it is guaranteed absolutely mothproof.

But before you buy upholstered furniture, whether guaranteed mothproof or not, you would like to know what is inside of it, if it is as good inside as it is outside. Let us see. You know what Marshall Cushions are. Lift them off and examine the Chesterfield itself.

And Remember: Over and above all, Absolutely MOTHPROOF

BESIDES its superior advantages of strength and appearance, Sani-Bilt Upholstered Living-Room Furniture is absolutely mothproof and guaranteed. Moth worms will never damage Sani-Bilt Furniture, because—unlike so-called "mothproof" furniture brought out to compete with it—there is nothing there they can live on. You may entirely rest your mind about moths in Sani-Bilt.

The Sani-Bilt mothproofing process was developed by a group of the world's leading chemists who devoted twenty years to experiment and research to find a solution which would effect a change in the animal fibre of silk, wool and hair, so as to destroy all attractions for moths and their offspring, without damaging or staining the fabric or leaving any odor.

Do not be carried away by the claims of any other furniture said to be mothproof, if you want Sani-Bilt. Sani-Bilt is permanently mothproof. Since it was introduced, competitors who scoffed at first and said there was nothing in it are now telling the Canadian public, "We have mothproof furniture, too." And they even imitate our guarantee tags. These imitations were produced in the stampede to share in the trade Sani-Bilt has created. But no one can imitate the secret Sani-Bilt process. The Sani-Bilt process doesn't depend on poisons or powders or evaporating sprays. These things are but temporary, at best. Ours is the only method known to Science of securing absolute lasting immunity from moths and we are the only Canadian manufacturers of upholstered furniture who are permitted to use it. Do not be deceived by imitations that have been rushed onto the market with no scientific foundation behind them.

Insist on Snyder's Sani-Bilt. You want the genuine, permanently mothproof Sani-Bilt. Our guarantee covers immunity from faulty construction, as well as from moths. Our trademark label is on the seat under the cushion. Make sure it is the genuine Sani-Bilt. Styles and prices to suit everybody. For sale at leading dealers.

The Finishing Coat

Suppose we take a sharp knife and rip off this beautiful mothproof covering. Do not be afraid. We have nothing to hide. Tear off the strong white cotton underneath, too. Every bit of material used is brand new and sterilized. Now, we come to a layer of fine, white felt. This is the "finishing" coat to the inner upholstery of the Sani-Bilt Chesterfield. It smooths the surface and makes it soft and fine. Tear it aside.

A Layer of Curled Hair

Next, we come to a layer of curled hair. This is real hair, treated by a cleansing and curling process, crisp, springy and full of "life". You can't crush it flat. It comes up again directly you remove your weight. It's the

same kind of hair—as goes into the best hair mattresses. We don't believe there is any better hair for upholstery purposes than the hair we use in Sani-Bilt. See how thick it is. And absolutely mothproof. Our process has removed all temptation for moths. Every hair is immune. The Sani-Bilt mothproofing solution saturates every particle of the cover and fillings, making them unpalatable to moths.

Thick Layer of Sea Moss

Now, we come to a thick layer of a certain kind of sea moss cured and dried. Squeeze a little of this moss in your hand. When you release your grip, it springs out full again, like silk. This is the thickest layer and gives body to the upholstery in this Chesterfield. You have often heard that a bed of moss is the softest of natural couches. We use the finest of dried moss, imported from Southern Seas, for these best-grade Sani-Bilt Suites.

The Steel Coil Springs

And now we are down to the springs. A greater number of springs are used in Sani-Bilt Chesterfields than in any Chesterfield on the market. These are double-cone coils of oil-tempered steel wire, firmly fixed in place and cross-tied with heavy cord, so as

to prevent them leaning over or sagging to one side. There are four rows of these springs in each Sani-Bilt Chesterfield, compared to the usual three, as found in other Chesterfields. Even our lowest-priced Chesterfields have forty springs in the seat and twenty-seven in the back. The edge of the seat is supported, as you see, by a heavy spring wire tightly stretched and firmly fixed to each arm.

Suites to Suit Everybody

Snyder's Sani-Bilt Furniture is made in the widest variety of styles and coverings to be found in Canada. Prices vary from the most economical to the most luxurious. There is a Sani-Bilt to suit every taste and every purse. Of course, the more you pay the greater will be your satisfaction in comfort and appearance. It is true economy to buy what will please you permanently. The fillings and coverings of our lower-priced lines are, of course, less expensive than in our best grades, but every suite, no matter what the price may be, is guaranteed to be soundly built and to be of good, fresh, new materials throughout. And, no matter what the price may be, every Sani-Bilt piece of upholstered living-room furniture is guaranteed mothproof, absolutely.

For Sale by all Leading Dealers.
