For some time past Thomas Mhoon, truck farmer living rear Brooklyn, had been miseing, each day, a number of young ducks. They disappeared so mysterious'y that their loss could not be accounted for in any manner. All theories as to how they were taken were smashed to pieces when it was known that no one had been near the place during the day the time. No feathers or other vestige could be found, which would undoubtedly have been the case if the towls had bee made away with by bawk or some 'var-

When sixty-five of the fluffy youngsters had disappeared Mhoon determined to watch the ducks for a day. He followed them down in the field to the little branch where they slipped into the water, No sooner had they arrived there than from a neighboring clump of bushes appeared such a snake as Mhoon had never seen before outside of a show. He is not a drinking man, and is not accustomed to see such things in broad daylight, but he had to pirch himself to make sure that he was in his right senses. While his eyes stuck out of his head in terror the monster snake glided up to the ducks, when they all set up a terrific quacking, as if they knew the end of the world was coming for come of them.

By this time the man had recovered him-

self, and, hastily running to the house, he secured his shotgun and returned to where

secured his shotgun and returned to where he had seen the snake. When he reached there he found the snake, which seemed filteen feet long and one loot thick, making off with a duck in its mouth. Mhoon pulled the trigger of the gun. When the smoke cleared away the reptile was stretched out, lashing its tail in fary. Mhoon kept away until its struggles had ceased, and approached it He kund out it was a moccasin, and when measured it was as long as a free rail measured it was as long as a fence rail, shout nine feet four inches.—Baltimore Herald.

Queer Rat Story.

A Deering gentleman tells a remarkable at story. His wife had been bothered by rats and mice playing tag in the dining room, and set a trap to catch them. Late that night the husband, hearing queer noises, stole down to the room. As he looked in he saw that a dozen mice had been caught in the trap, which was surrounded by four rats. They had dragsurrounded by four rats. They had dragged the trap into the middle of the rorm, and were evidently bolding a consulation. When the light flashed upon them they hurried their preparations to a close. One big rodent seized the door of the trap between his teeth, and another seized him by the tail, and the third and fourth then took hold. A sudden pull was given, the door flew open, and in an instant rats and mice had disappeared, leaving the traps with the door shut and every vestige of bait gone.—Portland Telegram.
