and half of it is more truly serviceable than a whole brush of the ordinary kind!

Every bristle gripped everlastingly in hard rubber

Do this with our brush at our risk - try it with any other **IF YOU DARE!**

THE DISTINCTIVE FEATURE OF EVERY

# RUBBERSET

TRADE MARK

## PAINT BRUSH

IS "THE CONSTRUCTION THAT DEFIES DESTRUCTION"

a construction made possible only by reason of the fact that the RUBBERSET is the brush in which every bristle is everlastingly gripped in hard rubber—a grip imperious alike to heat or cold, to use or old age, or to the chemical action of the various ingredients of paints, varnishes, enamels, or their detergents.

Utterly unlike the ordinary brush whose uses are limited to those particular compounds which will not affect the glue, pitch, shellac or other substance in which its bristles are temporarily held, the RUBBERSET has long been recognized as the brush of universal service.

Do not be misled by imitative names. Insist upon seeing the inscription RUBBERSET upon every brush you buy. That brush is guaranteed to make good—or WE WILL!
