

I enclose a rough sketch showing the ground plan of the buildings, and I have to request that you will inspect the same and report what alterations or additions, if any, it may be necessary to have made and to what special purposes in connection with the institution, in your opinion, the several buildings should be adapted, if the proposal to establish an Industrial School therein is given effect to. It would appear from the plan that the building used by the Police as officers' quarters, and marked A on the plan, would afford suitable accommodation
