Record Filing Systems

FILING and Record Keeping Systems is our business. To devise the simplest and safest methods of keeping every record used in a business office so that it can be instantly located, and to make the strongest, cleverest and handsomest filing cabinets is our Ideal.

We have a system for filing every record used in business.

These systems have been perfected only after long experience in installing business methods.

Our Systems save Time, Labor, Money. No matter what the nature of your business we have prepared methods for filing the records.

Tell us your Filing Problems. We can assist you to find the simplest solution. We will send our Catalogs, or our Representatives, or both.

Our Representatives visit every City and Town in Canada. If there is not one of our System stores in your city ask us to have our Representative call, or our Correspondence Department will give you intelligent service by mail.
