**An Easy Way**

**Salt the Fleas.**

The best means of controlling fleas in most instances is very simple. Fleas usually originate in the basement of the house, or in some covered place such as woodsheds and stables, to which hogs, dogs, or other such animals have access. The remedy is to give the basement, shed, or other breeding place a thorough cleaning, burn the litter, and then sprinkle the floor or ground in the building or shed with common salt. The salt should be sprinkled thickly enough almost to cover the ground and should then be wet down with water. It should not be wet sufficiently to cause it to run, however. If there are about the place any houses, cribs, or the like built on piles so that hogs and other animals can go under them, salt should be applied there. Generally speaking, it is fairly easy to determine where the fleas originate, and it is usually such a place as can be reached by the salt treatment. It may be necessary to repeat the operation two or three times at about three-day intervals.

**Fewer Cattle Shipped.**

A total of 21,530 head of cattle were shipped from the port of Montreal during the past season of navigation, as compared with 31,217 head for the season 1921, a decrease of 9,687 head. Of the above total shipped in 1922 there were 7,165 head from the United States, so that the total number of Canadian cattle that went forward to the British markets from this point was only 13,915 head. There was no export business done in sheep during the past season, while during the preceding year shipments amounted to 4,064 head.

It is surprising how far the table scraps and scattered grain will go toward maintaining the hens.

There is little excuse for any one using a grade or scrub bull when it is so easy to secure a pure-bred.

**For Sale**

Five Row Team Potato Sprayer new, only used one season. Apply to D. Strathdee, Aldershot.
