ground is unprofitable to work other practically cease. than by hydraulic methods. All of the grants contain clauses thus describing the ground covered by

Nevertheless it is a fact that such work as has been done upon them system of working placer ground. More than this. Within the limits of a number of these concessions notably the Bronson & Ray and Matson & Doyle grants are claims owned by individual miners which have been and are today being worked with splendid results. The concessionaires would have the public believe that their ground contiguous to working and paying claims is unfit for placer operations

is through cancellation of the concessions and restoration of the ly the genuine Klondiker revels in ground affected to its proper owners

## MUST BE EDUCATED.

A delegation of U.S. senate will make a visit to Alaska dur the summer for the purpose vestigating its resources as a legislative requirements. Th is an excellent one and mis followed by members of pa with much advantage to the territory. The east must be educated up to a full understanding of the necessities of the territory end while much may be anticipated through the efforts of Mr. Ross, p spection on the part of a delegation of M. P.'s would be of great advantterritory is impressed with the won sources already developed and ad-

The way to spread the truth regarding the country is to bring people to see it with their own eyes. The whole district would profit inmensely from a visit of eastern legislators who would return to their constituencies with ideas vastly changed from the prevailing view of the Yukon now held in the east.

## LOOKS LIKE BUSINESS.

The report which appears elsewhere in the Nugget with respect to the work done and in contemplation on the Violet group of quartz claims indicates what may be anticipated an the way of quartz development during the coming summer.

On this particular property values have been shown of sufficient extent to warrant the owners in making

The Klondike Nugget a small stamp mill upon the ground and it is expected that it will be in operation in the not distant future.

Obviously there are difficulties to be encountered in opening up the industry of quartz mining just as there \$24.00 have been immense obstacles to over-\$2.00 come in solving the various problems .25 incident to successful placer opera-

only by practical experimentation and partments. Of the former there is at gar and therefore the price which will has a direct bearing upon the legal the creek for the outside. He will not there is no alternative. Outside money.

The main point as to the existence reactical admission of 'no circulation.' in factorily established and it remains the KLONDIKE NUGGET asks a good only to be determined in what ways thereof guarantees to its advertisers a development may best be carried on paid circulation five times that of any in order to realize the most satisfaction of the page of th tory results.

The men who pioneer the first quartz mine to a dividend paying Creeks by our carriers on the following hasis will be entitled to substantial days: Every Tuesday and Friday to Eldorado, Bonanza, Hunker, Dominion, recognition from the whole community. If one stamp mill is successfully established, others will follow in
