The Liver

When out of order, involves every organ of when out of order, involves every organ or the body. Remedies for some other derange-ment are frequently taken without the least effect, because it is the liver which is the real source of the trouble, and until that is set right there can be no health, strength, or comfort in any part of the system. Mercury, in some form, is a common specific for a sluggish liver; but a far safer and more effective

Ayer's Pills.

For loss of appetite, bilious troubles, constipation, indigestion, and sick headache, these
"ills are unsurpassed.

For a long time I was a sufferer from
stomach, liver, and kidney troubles, "speriencing much difficulty in digestion, with
severe pains in the lumbar region and other
parts of the body. Having tried a variety of
remedies, including warm baths, with only
temporary relief, about three months ago I
began the use of Ayer's Pills, and my health
is so much improved that I gladly testify to
the superior merits of this medicine."—
Manoel Jorge Pereira, Porto, Portugal.
"For the cure of headache, Ayer's Cathartic Pills are the most effective medicine I
ever used."—R. K. James, Dorchester, Mass.
"When I feel the need of a cathartic, I take
Ayer's Pills, and find them to be more effective than any other pill I ever took."—Mrs.
B. C. Grubb, Burwellville, Va.
"I have found in Ayer's Pills, an invalua-B. C. Grubb, Burwellville, Va.

"I have found in Ayer's Pills, an invaluable remedy for constipation, biliousness, and kindred disorders, peculiar to miasmatic localities. Taken in small and frequent does these Pills.

doses, these Pills Act Well on the liver, restoring its natural powers, and aiding it in throwing of malarial poisons."

—C. F. Alston, Quitmai Texas.

"Whenever I am trobled with constipation, or suffer from w: of appetite, Ayer's Pills set me right ags' x"—A. J. Kiser, Jr., Rock House, Va.

"In 1888, by the advice of a friend, I began the use of Ayer's Pills as a remedy for bill. the use of Ayer's Pills as a remedy for bil-fousness, constipation, high fevers, and colds. They s'rved me better than anything I had previoud 'wied, and I have used them

in attacks o' nat sort ever since."—H. W. Hersh, Jud nia, Ark. Ayer's Pills, PREPARED BY DR. J. C. AYER & CO., Lowell, Mass. Sold by all Druggists and Dealers in Medicina

CANADA THE BEST COUNTRY ON EARTH.

Rive 5 in New Brunswick far surpassing in beautiful scenery. The river in narrow and in places uninteresting and were it not for the castles along its banks would be very tame. Every inch of ground appears occupied and there is a hard appears occupied and there is a hard attuggle for the masses to secure.

In conception with these areas.

and intensely bigoted. They have a son, and from the results obtained great antipathy to everything Eng-lish and are especially severe on the had any nutritive value. The exwife of the late Emperor Frederick. periments relating to the different Of course there are many beautiful swine breeds were carried on at resorts far surpassing in magnifi-cence anything on this side of the and the Tamworth. Under an idenwater. Some of the opera houses are tical course of feeding the different marvels of beauty-but, you have to breeds have shown a very uniform pay to enter them, a ticket costing degree of thriving; neither in the

SWINE FEEDING IN DEN-MARK.

about \$2.50.

EXPERIMENTS REPORTED BY U. S. CONSUL RYDER, OF COPNHAGENE,

(JUNE 7, 1890.) Publicity has lately been given to the growth period (from 35 to 75 the results obtained from a further pounds) the consumption per pound range of experiments made bere in relation to awine feeding. With these latter experiments it has been grain; from 75 to 115 pounds, 4 pounds of grain, and from 115 to endeavered to determine the food 155 pounds, 4.8 pounds of grain. values of maize, fine rye bran. man- Taking the two last named periods golds, and boiled potators, coupled with the thriving properties of the different breeds of swine. The proportional figures hitherto acknow the ledged, and by most agriculturists ledged, and by most agriculturists.

Taking the two last hamed periods of product that is to say from 75 to 155 pounds—the grain —none more so in the whole round consumption should so exactly tally of the agricultural year. So busy ledged, and by most agriculturists of experiments, should contage to get out the plow and courses of experiments, should contage to get out the plow and contage to get out the plow and courses of experiments. accepted as the relative food value ta ply bear full testimony to the start it going. Fall plowing is the of milk and whey, as well as of corn, egularity and exactness with only thing that insures an early were again made use of, namely, that which these experiments have been spring and a long season. the highest and lowest temperature in the 24 one pound of milk given to swine, carried on. was equal to two pounds of whey, and one pound of corn, rye or barley was equal to six pounds of milk

or twelve pounds of whey . When the hair shows signs of failing begin at once to use Ayer's Hair Vigor. This preparation strengthens the scalp, promotes the growth of new hair, restores the natural color to gray and faded hair, and renders it soft, plaint, and glossy.

Judge—"Fellow you are condemned to death. Is there anything you would like to eat before you are executed?"

African Criminal!—"Yes? thejudge."

Med experiments are of some interest in this respect, as by giving a notable contribution of food poor in albumen, such as mangolds and potatoes, all lavishness of albumen inght thus be considered to have been avoided. These experiments have neither at this time nor on the previous occasion been able to weaken of such chemical physiological question. The main results obtained from the last food experiments have been as follows:

provero; many things not done in time would better not be done. A few minutes may be saved many times a day by a wise arrangement for the doing of things constantly respected—suchas harnessing a borse or putting a wagon in its place. Time may be gained by a little forethought in directing the work of every man on the place. Time is money? He that is careful also to avoid all unnecessary small expenses. He resolutely follows the dictates of pru dence. The farmer's education is a fine, six small small onions chopped, one

ture. There is, however, the one drawback to make as fattening food for swine, that where it forms a larg er part of the entire food it is found to have an unfavorable influence on the analyte of the flesh. There we conize that puncture is adopted as a ready made method of training to proper habits.

The need of training the young farmer for his profession is recognized in some of our agricultural schools, where the military discipline is adopted as a ready made method of training to proper habits.

They acquire that puncture. the quality of the flesh, thereby oc- of action. They acquire that punc-

prices. Castoria is recommended by physicians for children teething. It is a purely vegetable preparation, its ingredients are published around each bottle. It is pleasant to the taste and absolutely harmless. It relieves constipation, regulates the bowels, quiets pain, cures diarrhea and wind colic, allays feverishness, destroys worms, and prevents convulsions, soothes the child and gives it refreshing and natural sleep. Castoria is the children's panacea—the mothers' friend. 35 doses, 35 cents.

The value of rye bran as swine food its further disparaged through its unfavorable influence on the quality of the meat. The flesh becomes soft, the same as after a course of maize feeding, this fault being of still more

3. That eight pounds of mangolds give compensation for one pound of grain. The experimens spound of grain. The experimens spound of grain. The experimens spound of grain the experimens spound of grain the experimens spound of grain. The experimens spound of grain the experimens spound spo eight pounds. In these cases where the fact farmers would do well Gents.—I took a severe cold, which settled in my throat and longs and caused me to entirely loose my voice. For six weeks I suffered great pain. My wife advised me to try MINARD'S LINIMENT and the effect was magical, for after only three doses and an outward application, my voice returned and I was ed by roots after the proportion of Ferrance would do well the fact farmers would do well to examine the stalks and fined whether they are hollow near the root, which is a destructive characteristic of this disease. Probably and milk or whey was 7.6 pounds, these hollow stalks are filled with fungus of poisonous character. application, my voice returned and I was able to speak in the Army that night, a one to ten, the growth was found to these signs are advised to dry and be increased by 8.3 and 8.6 pounds. burn them, as the best means of at the smallest cost is the best cow. Again on the other hand, where half stamping out the disease. the grain food was allowed to be re-Yarmouth. placed by roots in the proportion of one to eight, the growth in the different lots of animals was found to approach pretty closely the one to the "Women made the best cashiers," replied: "Yes, and they make capital tellers, also."

other, namely, with 8.5 pounds for the grain food and 8.6 pounds for the roots, thus showing a slight the roots. the roots, thus showing a slight leaning in favor of the latter. As a point of considerable importance, it must, however, not be omitted to mention that under a course of root what ever race she belongs to. feeding the flesh is of such good quality that it in no way could be nangolds were given in a finely rasped and in a raw state. To obtainfavorable result from feeding with thoughtfu! man and good farmer there must be mineral substances as well coots, it is desirable that the swine will consider his horse and not abuse as fat and caseing in their milk. should be accustomed to this food it. from the very commencement. It will not answer to commence with grain feed and then go to roots with that regularity which is so necessary a few apples, or a farmer finds a in order to arrive at good results.

4. That four pounds of boiled very often be an amount of energy, potatoes give compensation for one | &c., displayed out of all proportion | pound of grain. With one-half of to the harm done, whereas the same grain and one-half milk feed the increased weight of one swine in ten In conversation with a recently returned tourist from the old world a Moncton Times reporter was told that after all nobetter country than our own existed. Speaking of the much-var need beauties of the River Rhine, our informant says that there are Rive 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River The River 5 in New Brunswick far surpassion of the River Rhine, our informant says that there are feed consisted of one-half grain, one-fourth potatoes are doing day and night a thousand times as much injury as cow or boy, but they will laugh at ridicule the man who makes the sed doing day and night a thousand times as much injury as cow or boy, but they will laugh at ridicule the man who makes the rich-in-albumen milk was replaced with potatoes, so that the feed consisted of one-half grain, one-fourth potatoes are doing day and night a thousand times as much injury as cow or boy, but they will laugh at ridicule the man who makes these destructive little beasts his study with an object of reducing the rich-in-albumen milk was replaced with potatoes, so that the feed consisted of one-half grain, one-fourth potatoes are doing day and night a thousand times as much injury as cow or boy, but they will laugh at rich case of 10.2 pounds, and when the rich-in-albumen milk was replaced with potatoes, so that the feed consisted of one-half grain, one-fourth potatoes are doing day and night a thousand times as much injury as cow or boy, but they will laugh at a strength potatoes are doing day and night a thousand times as red doing day and night a thousand times are doing day an
