Preachers Follow Church Members To the Ball Games

Chicago, Ill., Aug. 26 .- Fearing that the national game, baseball, is making too great inroads into the attendance of regular churchgoers on Sunday, the ministers in Chicago have begun a movement by which they will go to the ball games for their parishioners.

President Charies W. Murphy, of the National League team, and Charles Comiskey, of the "White Sox," have declared that they are willing to allow ministers to preach for a short time before Sunday games on their grounds. Other major league managers have been quescioned concerning it is intended to have a regular corps of preachers of different de nominations assigned to all ball parks before Sunday games are

New York, Aug. 27.—The big carnival of the Motor Racing Association at the Brighton Beach motor drome track today brought together some of the fastest automobiles of this country and Europe. The carnival is planned to continue for two days, concluding Saturday night with the finish of the 24-hour race, which starts at 10 o'clock to-night.

Ten o clock this morning was the hour set for the start of the first contest, a special match and some short events. Three cars, Italian, French and Americonstruction-Fiat, Hotchkiss and Christie-driven respectively by Depal-ma, Kirpatrick and Christie, were en-

ma. Rippatrick and Christie, were entered for the special match.

The track had been reconstructed during the last three weeks, the turns have been more highly banked and widened, and with weather conditions favorable, all of the auto experts were of the opin-

In order to stay in the running in the Intercity League race, for the honors in the second series, the West End Pleasure Club team must win to-morrow's game from the Veritys at Britannia Park, and although the Veritys will be on hand wift the strongest team of the year, a new twirler having been secured for the balance of the season, Manager Fred Bradley is confident that he will get away with the game, which will be called at 3 o'clock sharp.

Manager Bradley has made several important changes in his team. Lanning, Hennessey and Conkle have been dropped, and to-morrow the Pleasure Club will face the Brantford crew with an almost entirely new team. Buscombe will likely take a rest and Jack Hynes will likely take a fest and Jack Hynes will likely take a rest and Jack Hynes will likely take a fest and Jack Hynes will likely take a fest and Jack Hynes will less the sharp to sharp t of the champion Broadviews, will be given a chance to show his worth on the difficult corner. Bothen, of the Broadviews, one of the most promising twirlers in the city, will also get a chance to make good and will be assisted by Memory, who will do the receiving. Carey, the hard-hitting outfielder, will look after the left garden and Bradley and Muir will cover the rest of the outfield. With this team, the Pleasure Club expects to trim any pitcher that the Veritys care to bring down and hold their position in the league race.

the Ionowing from Parhament Hill shows that the Ottawa bunch has serious designs on the Grey Cup:

The Ottawa Rugby football team will hold its first preliminary canter on Cartier square next week. The Rugby bell will be available at the O. A. A. C. from Monday on, and the players will familiarize themselves with the touch of the clusive pigskin on the square before they set down to the grind in uniform on Varsity Oval or Lansdowne Park. In former years, it is interesting to note, it was a customary thing to see a few men arrayed in football garb trotting over the square passing the ball around a week or so before the first important match of the season. These men would turn out on the day of the game and play a remarkable game. But the champonship is usually taken by the club that gets to work first, and it is significant of the determination of the Oitawas that they are making such an early and energetic start this year.

divise that they are many are many and energetic start this year. Meahwhile President Dr. Nagle and secretary UDonahoe are attending to the matter of securing grounds. The next executive committee will be held on Sept. 30

Mac Mctilton and Barney Quinn have been engaged as trainers for the season. Specual attention will be paid to the intermediate squad this year. They will have a trainer for their very own and separate lockers. Rubbers will be available at practice for the junior men also, and they will be given every chance to make good. The trainer will accompany them on the trips.

It is almost beyond doubt that Murray Kennedy will be again in a red, white and black uniform this fall. Murray has been in communication with members of the Otttawa executive for some time and has expressed the desire to return home to play football. His brother, Hal, will, of course, be an absentee, worse luck! The present make-up of the back division is rather difficult to dope out, but Jack Williams surely has a right for centre half, owing to his magnificent showing in that position at the final game with the Tigers in Kingston last fall. In Tom twilliams the Ottawas believe they have another Stronach and the well-known soccer player will be tried out on the wing line in the position Jack Ryan used to occupy.

"TY" COBB ACCUSED OF ROUGH PLAYING BY PRES. JOHNSON.

Star Outfielder of American League Denies That He Attempted to Spike Baker.

Chicago, Aug. 27.—President Johnson

Chicago, Aug. 27.—President Johnson last night declared himself against what he styled the rowdy tactics of tyrus Cobb, who is said to have maliciously driven his armored shoes against Third Baseman Baker's arm during the series just closed with the Philadelphia team. "There's been altogether too much of this sort of game at Detroit," asserted Mr. Johnson, "and somebody is going to be made a shining example of if I hear of another such affray. Cobb seems to be the chief offender, and a word of advice should go a long way. He must stop that sort of playing or he will have to quit the game."

Detroit, Aug. 27.—"Ty" Cobb, the star outfielder of the local American League team, positively denied to-day that he, or any other members of the Detroit team, have attempted to spike players on opposing teams.

After reading the statement of President Ban Johnson, that he, Cobb, must stop spiking players or quit the game, Cobb said:
"I have never attempted to spike an-

Cobb said:

"I have never attempted to spike another player, and I deny positively the charge that I have employed rowdy tactics. Of course I run the base hard and slide hard. But the baselines, by every rule of baseball, belong to the runner, and if the baseman chooses deliberately to get in the path and try to block the runner off, he does so at his own peril. I did not maliciously spike Third Baseman Baker, of the Philadelphia team, I slid into third base and he was on the line.

"The umpires whom President Johnson hires have seen me every time I have shd into a base and the baseman has been hurt. If I have murderously and deliberately tried to put out of the game any of these men, why have not the umpires reported me? They know perfectly well there has been no intention on my part to injure the players."

THE COLLINGWOOD.

Detroit, Mich., Aug. 27.—It is probable that the bids for the raising at the sunken Collingwood will be all in today. The hole in the Collingwood is reported to be about 30 feet long. Captain Baker says it also extends clear down to the turn of the bilge. Captain Baker last night expressed the opinion that the break in the ship's side can be patched and the boat pumped out and raised without taking out the cargo.

DETROIT RIVER.

U. S. Authorities Want te Deepen the Channel.

(Special Despatch to the Times.)
Ottawa, Ont. Ang. 27.—The United
States have applied for permission to
carry on extensive works on the Canadian side of the Detroit River for
the purpose of deepening and straightening the channel in the vicinity of
the Bois Blanc Island. The work
would require an expenditure of about
two million dollars. The traffic of
United vessels is particularly heavy
at this point which is near the Lime
Kiln crossing, where the United States
has already spent a couple of million
dollars in works on the channel on
the Canadian side. The application
has been referred to the Waterways
Commissioners, but it is practically
certain that it will be granted.

LIVE STOCK.

The railways reported 93 car loads of live stock received at the city cattle market for Wednesday and Thursday, consisting of 1,399 cattle, 1,292 hogs. 1,923 sheep and lambs, 284 calves and

horses.

The bulk of the deliveries of cattle

The bulk of the deliveries of cattle were of the common to medium class, with a fair sprinkling amongst them of good to choice.

Good cattle sold readily at firm prices, but the common and medium were from 20 to 30c per cwt. lower than at the commencement of the week.

Trade was active for the good, but slow for the lower grades.

Exporters— Geo. Rowntree reported having bought a few exporters at \$4.70 to \$5.80 per cwt.

Exporters—Geo. Rowntree reported having bought a few exporters at \$4.70 to \$5.80 per cwt.

Butchers—George Rowntree bought 370 cattle for the Harris Abattoir Co. at \$3.75 to \$5.60, the latter being for prime picked lots; cows, \$1.50 to \$4.60.

Stockers and Feeders—Receipts ligher and trade slow. There were a few dealers looking for some good quality feeders, which are scarce. George Dunn had the loads of Manitoba feeders, which sold as follows: One load feeders, 940 lbs. each, at \$4 per cwt.; one load feeders, 970 lbs. each, at \$3.60. Stockers were quoted at \$2.50 to \$3 per cwt.

Milkers and Springers—Receipts of milkers and springers were fairly liberal all week, and several eastern buyers being on the market caused a good trade. Prices ranged from \$35 to \$65 each, but not many brought the latter price. The bulk of the best cows ranged from \$45 to \$55 each.

COBALT STOCKS

COBALT STOCKS.

There was quite a little movement in Ophir stock yesterday, the issue selling up to 1.75 on the strength of encouraging news from the mine. A telegram from the secretary announced that a new vein had been struck on the east side of the shaft at a depth of 105 feet, carrying ore values of from two to four thousand ounces. The stock opened at 1.45, advanced to 1.75, and closed at 1.65, as against 1.38 on Wednesday. Foster had a somewhat erratic sale, advancing to 701-8 on the morning board and receding to 59 at the close. The other issues were somewhat weak and lisless, notably Rochester, which closed around 14, with sales at 133-4.

CANADA'S BANKING POSITION.

The amount of foreign capital now in-cested in Canada has caused the Canadian monthly bank statement to become of international importance. As noted elsewhere, several hundred millions of

of international importance. As noted clsewhere, several hundred millions of dollars are invested in industrial and manufacturing enterprises in the Dominion, which sum is controlled by United States financiers. As to the extent to which British capital is being invested, the fact that Canada went to London in July for more than ten milloin pounds sterling is sufficient indication.

The aggregate authorized capital of Canada's chartered banks is now \$141,406,606. Of that sum, nearly 99 millions have been subscribed and 97 1-2 millions have been subscribed and 97 1-2 millions paid up. According to the Monetary Times of 1870, the total authorized capital of Canada's chartered banks was, in that year, \$41,506,606, of which \$32,800,308 was paid up. Thus in forty years the capital banking power has increased about 243 per cent, in authorized capital and 203 per cent in capital actually paid up, an average increase of approximately 5 per cent. per annum. Then, again, banking development has fully kept pace with the general progress of the country. For instance, during the first seven months of this year no less than 140 new branches of our banks were opened. Wherever deposits were to be obtained. months of this year no less than 140 new branches of our banks were opened. Wherever deposits were to be obtained of good loans required, our financial institutions lost no time in fulfilling their mission and satisfying legitimate needs. The mining industry in Northern Ontario may be cited as an example. The city of Cobalt is amply provided with banking facilities, and even the new district of Elk Lake has three branch bank offices. After the United States panic and the consequent and natural decrease. ing facilities, and even the new district of Elk Lake has three branch bank offices. After the United States panic and the consequent and natural depression in Canada about two years ago, it was said that two good average crops in the Canadian West would pull the coustry out of the industrial mire. Last year produced a satisfactory harvest at reasonable prices. This year is likely to do better. But the feature of our economic career in a recent period is the remarkable progress which has been made ou the strength of not two, but of one year's crop, together with the cuttious attitude of our banks and business men. That the banks have been supplied with ample money for loaning purposes is at once evident from a glance at the deposits account. Only thriew within the past twelve months have deposits on demand shown a decline, and only twice have deposits after notice in the same period exhibited a loss. In July, 1908, the total deposits were 567 millions, and in July last 688 millions.

HOW INSECTS BREATHE

have a compiex system of tubes running throughout the whole length of the body, by means of which air is conveyed to every part of the system. As they are destined to contain nothing but air, they are strongly supported to guard against collapse from pressure.

This support is furnished by means of a fine thread running spirally within the walls of the tube, much in the same way that a garden hose is protected with wire. There are generally two of these tubes which run the whole length of the insect's body.

Many flies, as larvae, live in the water. Aranged along each side of their bodies is a series of exceedingly thin plates, into each of which runs a series of blood vessels. These plates act and absorb the oxygen contained in the water. The tail ends in three featherlike projections. By means of these the larva causes currents of water to flow over the gills and thus their efficiency is increased.

The gnat also lives in the water as a larva. But it has no gills. Therefore it cannot breathe the oxygen in the water, but must breathe air. This is done by means of a spicade situated at the tip of its tail. Indeed, the tail is prolonged into a little tube. The larva floats along head downward in the water with this tube just above the surface to enable it to breathe. After some time it is provided with two little tubes which act in the same manner.—Chicago Tribune.
