

VICTORIA'S WIN SECOND MATCH

By a Score of 2 to nil the Victorias cinched the second match of the leagues schedule by defeating the Fire Department in Wednesday night's game.

The game was brisk and the pace maintained for the first ten minutes at the puck goal hunting from one end of the ice to the other.

A glaring error on the firemen's team was the wide playing of the defence particularly when the point retired with a loosened skate (the Victorias dropping one man to even up) the cover instead of falling back played the ice with the forwards leaving the approach unguarded.

The game while not a pink tea affair was fairly free from deliberate rough play raw sports in playing being about equally divided, although the firemen received the greater number of penalties.

Referee Hitchon who is unquestionably one of the best Hockey Judges on the North Shore, handled the game very satisfactorily but was handicapped through the present league's not having adopted a fixed set of rules, and this year's radical changes of the rules governing hockey cannot but lead to misunderstanding between referee and players until an authorized set of rules are adopted.

Line up for teams: Victorias: Kelly goal, Moore's point, Matthew's cover, Mowat, Delaney rover, Ryan, Schurman rover, Smith, Wallace centre, Ferguson, Wall right, Sullivan, Keith left, Geo. Wallace.

Table with columns: Player Name, Position, Points, Goals, Assists. Includes Sullivan, Smith, Delaney, Wallace, Bondreau, Schurman, Ferguson, Ryan, Mowat.

THE BEST REMEDY

For Women—Lydia E. Pinkham's Vegetable Compound

Belleville, Ont.—"I was so weak and worn out from a female weakness that I concluded to try Lydia E. Pinkham's Vegetable Compound. I took several bottles of it, and I gained strength so rapidly that it seemed to make a new woman of me.

Women everywhere should remember that there is no other remedy known to medicine that will cure female weakness and so successfully carry women through the change of life as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs.

For 30 years it has been curing women from the worst forms of female ailments—inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, and nervous prostration.

If you want special advice write to Mrs. Lydia E. Pinkham, Lynn, Mass. It is free and always helpful.

NEW CARLISLE: Rev. E. A. Dunn and Mrs. Dunn have left for Quebec City. Mr. John Thompson has returned from Boston, where he has been spending the past three weeks, the guest of his daughter Mrs. Collins.

Miss Gertie Cooke who has been sitting her parents Mr. and Mrs. A. Cooke, returned to New Richmond to resume her duties as teacher. The Academy school opened again on Jan 8 after being closed for the Xmas holidays which began Dec. 22.

Every Woman is interested and should know about the wonderful MARVEL Whiting Spray. The new Vaginal Sprays, best most convenient. It cleanses, soothes, and relieves. Windsor Supply Co., Windsor, Ont.

BLACK CAPE: Black Cape Jan 22—We are pleased to see that the train has got through again after eleven days of no through train.

Mr. Hedley Henderson has returned to Ont. after spending a few weeks at his home here. Miss Kerr of Bonaventure River, who has been spending a few weeks with relatives and friends has returned to her home.

Mr. Hastie Henderson who has been down the Gaspé coast for some time is expected home in a few days.

CAMPBELLTON TOWN COUNCIL

Campbellton council met on Tuesday evening, the 23rd, Mayor McDonald in the chair. There were present at the opening of session Councillors Moores, White, Mowat, Alexander, McKenzie, Miller and Pinault.

The minutes of the previous meeting were read and confirmed. Communication was read from the Board of Trade enclosing resolution dealing with the advisability of having a crossing or subway at Victoria Street.

It was moved and seconded that a memorial be prepared for submission to the Minister of Railways. Communication from R. M. Hope re electric light power for St. Andrew's church organ referred to Electric Light committee. The fire committee were authorized to get prices for a piece of land at or near the rock out on the C. R. for the purpose of erecting a tower to hold a public fire alarm bell.

After discussion on a new fire alarm system for the town it was agreed to purchase 6 fire alarm boxes, 10 tappers, gong and indicator, and all necessary cells and appliances for the establishment of a Gemwell system of fire alarm. This makes a beginning which will be added to as occasion arises.

Petition was received from A. Lacasse for a license which was reported to Police and License committee.

The following Board of Health accounts were ordered to be paid: Dr. Martin \$9.00, Dr. Finault 13.00, Geo. Verette 14.98, A. McG. McDonald 34.25.

REPORTS OF COMMITTEE

Councillor Pinault submitted report of the Public Property and Street committee recommending payment of accounts totalling \$837.42. Councillor Pinault also submitted the annual report for publication in the town year book. Councillor Mowat submitted report of the Electric Light committee recommending payment of accounts totalling \$2365.49. Councillor Lunan submitted the annual report of the Police and License committee which was received to be published in the town year book.

Councillor Alexander's report from Water & Sewerage committee recommending payment of accounts totalling \$95.38, councillor White from Fire Protection committee recommending payment of accounts totalling \$9.60, councillor Moores from Public Charities, accounts \$21.54. These reports were all received and adopted. Councillor Mowat submitted verbal report of his attendance at the county council the report of which proceedings are to be found in another column.

After discussion on this report it was agreed that the Bye-Laws committee take up the matter of necessary legislation which is required by the town of Campbellton.

The annual report of the Board of Health was received for 1911, and ordered to be printed in the town book.

Councillor Miller reported progress of the special committee appointed to deal with the matter of a roadway through Robert L. Duncan's and J. B. Christopher's land.

The Public Property and Streets committee were authorized to get tenders for cats and hay to be delivered as required.

Councillor Pinault brought up once more the matter of peddlers coming into town selling goods without a license thereby hurting our own store trade. It was admitted that it was manifestly unfair, but nothing was done to remedy it.

The fire committee were instructed to have the fire telephone removed from Shives mill which is now closed down for the winter.

An interesting discussion took place on the alleged insubordination of Wm. Taylor the street commissioner. After desultory talk and cross voting it was agreed that the street commissioner be notified that he will receive all orders regarding the town horses from Wm. Noble. Council adjourned.

FARM AND FIELD

DISPOSITION OF HORSES Many Vicious Tempers are Developed Through Improper Handling and Teasing.

Wouldn't you give quite a bit for a tip as to the disposition of a horse you purposed buying? Let him be a model in type and sound in every respect, but if you find he has some vicious habit, or an ugly temper you will begin to look for another horse. Now, isn't that right?

Although it must be admitted that disposition is to a certain extent inherited, yet most vicious-tempered horses can have their temper tamed by thoughtful handling or ill-treatment as colts. A vicious temper can be developed in a colt through improper handling as was ever bred into one. Besides, as much harm can be done by pampering as by ill-treatment or teasing. The process of developing an ugly disposition though, usually takes in all three treatments, beginning with pampering, followed by teasing and ending with abuse.

A little thought by the owner or groom in handling the colt can maintain a sweet disposition, or substitute to a certain extent an inherited vicious temperament. Kind but firm management is necessary at all times. Never try to make the colt do anything unreasonable, but see that he finishes any training you undertake to put him through. Give him enough training with the halter to let him thoroughly understand that he is to do as you wish; handle his feet and legs, and do not allow any wild frisking while he is being led. Training with these points in view will do much to develop a temperament that should at least give a good working horse, no matter what the breeding may be.

Potato Desection in Germany

"The Problem of Potato Desection in Germany" is the subject of a timely monograph. The 1910 potato crop in Germany amounted to 1,517,000,000 bushels. Of this enormous production, no less than 200,000,000 bushels are lost yearly through decay. It was to prevent this loss that the plan of desiccating or drying potatoes was originally adopted, and in 1910 there were already 250 desiccation factories capable of using 22,000,000 bushels of potatoes. They have become a favorite foodstuff in Germany. They are of the highest digestible order and the appearance of illness such as colic in horses, stones in the bladder in lambs, intestinal catarrh in calves, flatulency in cattle, etc., are not observed when they are used. Experiments have proved that both in intrinsic value and in percentage of starch they are superior to barley or oats.

Animal Food for Fowls

These are the most expensive foods. They form a substitute for the worms and insects that are the natural summer food of fowls upon free range. Fowls confined to small runs require to be fed on more or less animal foods during long, dry spells in the summer and during the winter. Even where the range is unlimited it frequently pays to feed animal food. It is generally believed, and we think rightly so, that good egg yields cannot be secured annually without the use of such foods as green-cut bone, beef scraps, or cooked refuse, meat, etc. Many believe that the larger the amount of animal food the fowls consume, the greater will be their egg production. There is good ground for doubting this statement, in that these foods are expensive, and the extra eggs may cost more than they are worth. Moreover, here in is where serious injury may be done to the hen's digestion and reproductive organs.

Advantage of Fall Breeding

The principal advantage gained by breeding mares in the fall is in the foal being born after the season's work is finished, and when most farmers can afford to have their mares idle. Many farmers are of the opinion that foals can be raised as well, if not better during the winter than in summer, as there is no annoyance from flies. One disadvantage is that the mare is worked hard during the summer until after harvest. Such heavy work is liable to bring about disastrous results. Also the mare does not get the succulent grasses of spring and early summer, which is so necessary to promote and maintain lactation.

Australian Butter Standard

Under a pure foods act in Australia, a new standard is being prescribed, which defines butter as the "clean, not rancid, fatty substance obtained by churning milk or cream." It was decided that it should contain not less than 82 per cent. of milk fat, not more than 15 per cent. of water, and not more than 4 per cent. of salt, and that it should not contain any foreign fat or oil, or any preservative or other foreign substance, excepting harmless vegetable coloring matter. It is when approved by the executive council, will be the standard for butter for home consumption.

Standard Apple Box

The standard bushel apple box is 20 inches long, 11 inches wide, and 10 inches deep. There is no standard half-bushel box for apples, although pears are marketed in what is called a half box. The standard full size box for pears is 20 inches long, 11 inches wide, and eight inches deep. The half size pears is the same size as standard box, but only four inches deep, would require to be 10 inches by 10 inches by five.

BEAVER FLOUR

combines the rich gluten of Manitoba Spring wheat and the lighter, but equally important, properties of Ontario Fall wheat. The two combined form a perfectly blended flour that makes bread light, white, nutritious and extremely palatable, while pastry made with Beaver Flour has a crisp, flaky texture that brings many a compliment to the cook.

MEANING OF THE CROSS

This cross (in red) has been adopted in Canada and all over America as the emblem under which the Crusade against Consumption is carried on. Every reader knows of the ravages of this disease; how, too often, the bread-winner of the family falls a victim, or the young man or young woman, with a promise of a happy and useful life, is stricken down.

This modern Crusade, like the one of old, is a winning fight. The death rate from Consumption in this province shows a decrease of over 25% in the past few years.

Nearly 6000 of these poor sufferers have been cared for in our Consumptive Homes in Muskoka and near Weston. To-day we have 300 patients under treatment—patients who, if they had the money, could not through year of contagion gain admittance into other hospitals.

In the Muskoka Free Hospital alone we are now caring for 156 patients. 128 of these cannot pay a single cent for the cost of their maintenance, 15 pay 70c. per day, 1 pays 57c. per day, 12 pay 50c. or less per day.

Our Trustees, having faith in the generous-hearted people of Canada, have continued to carry on this work during the past year.

Money to pay doctors, food, nursing and caring of these sick ones, is urgently needed. Will your readers help and have the joy of sharing in a work that has the promise of the Master's reward?

W. J. GAGE, Chairman Executive Committee, National Sanitarian Association.

REWARD.

WHEREAS five years ago the word Zam-Buk was unknown in Canada, and Zam-Buk is to-day admitted to be the finest cure for skin injuries and diseases;

AND WHEREAS it has been represented to us that there are still some good Canadians, and even some mothers and heads of families who have not yet tried this great balm, we hereby offer a REWARD of one free trial box of Zam-Buk to every person who has not yet tried this wonderful balm;

PROVIDED they send by mail to us this proclamation together with one-cent stamp to pay return postage of such box;

AND FURTHER PROVIDED that they address such application to our offices at Toronto.

Given under our hand this day.

ZAM-BUK.
