TO EXPECTANT MOTHERS

Letter from Mrs. Ayars Tells
How Lydia E. Pinkham's
Vegetable Compound
Helped Her

Spring Valley, Sask.—"I took the
Vegetable Compound before my last
confinement, when I got to feeling so
badly that I could not sleep nights, my
back ached so across my hips, and I
could hardly do my work during the day.
I never had such an easy confinement
and this is my sixth baby. I read about
Lydia E. Pinkham's Vegetable Compound
in the 'Farmer's Telegram' and
wrote you for one of your books. We
have no druggist in our town, but I saw
your medicine in T. Eaton's catalogue.
I am a farmer's wife, so have all kinds
of work to do inside and outside the
house. My baby is a nice healthy girl,
who weighed nine pounds at birth. I
am feeling fine after putting in a large
garden since baby came. (She is as
good as she can be.) Yours is the best
medicine for women, and I have told
about it and even written to my friends
about it."—Mrs. ANNIE E. AYARS,
Spring Valley, Sask.

Lydia E. Pinkham's Vegetable Compound
is an excellent medicine for expectant
mothers, and should be taken
during the entire period. It has a general
effect to strengthen and tone up the
entire system so that it may work in
every respect as nature intends. All
druggists sell this dependable medicine.
Give it a trial.

DEED FORMS
We have in stock, Deed Forms,
Lease Agreements, School District
Assessment Lists, Road Tax Books,
and County Rates.

Auctioneer

BANK BILL PAPER IS RECLAIMED

What becomes of all the defaced
and damaged paper money is
question that has often been asked
of bankers. Heretofore the answer
has invariably been, that it is
burned. Many interesting
stories associated with the burning
ceremony have gone the rounds
of the press, among them being
one in which an excessive draft
in the furnace littered St. James
street in Montreal with partially
burned bills. Ottawa's fire
department was once called out
to answer an alarm of fire when
damaged paper money was being
destroyed in the furnaces of the
Finance Department in the East
Block. Later the melting furnaces
at the Mint were used for this
purpose.

Destruction by burning of con-
demned paper money is likely to
become an obsolete practice. The
Forest Products Laboratories, of
the Department of the Interior,
have been carrying on a series of
experiments to develop the best
method of recovering good paper
stock from the condemned paper
currency withdrawn from circula-
tion by the Department of Finance
and the various banks, and to
ascertain if such a method is
commercially feasible. Refining
of the stock produced under normal
cooking conditions was carried
out and, by the use of a special
washing equipment, it was found
possible to recover an absolutely
clean pulp.

The paper used for the printing
of bank notes is made from pure
pulp linen cuttings, and is one
of the most expensive papers
manufactured. It will readily be
seen that if the Forest Products
Laboratories are able successfully
to reclaim the paper from con-
demned currency it will be of
considerable commercial importance.

Normal School Will Have Third Largest Total

Dr. H. V. B. Bridges, Principal
of the Provincial Normal School
announced that the full complement
of students for that school is
now made up and numerous
applications for admission have
been refused. The school opened
today.

The maximum number is now
350. Last year it was 400. The
year before that number was ex-
ceeded. In addition to the
maximum number allowed there
is the French Class which opened
its course upwards of a fortnight
ago. Twelve students are in the
class. The total attendance this
year will be the third largest in
the history of the school. But
for the limitation upon registration
it would be larger as there is
keen interest in the teaching
profession at the present time.

Classification
Dr. Bridges stated that the
350 students would be classified
as follows:—Class I, 117; Class II,
175; Class III, 58. The number
of men entering is less than it
was last year when the number
was one of the largest on record.
The reduction is necessary on
account of the imposition of the
maximum.

An Elaborate Apparatus Catches Many Mosquitoes

Belgrade, Aug 26—One of the
great troubles of Serbia is the
Malaria epidemic and even in the
neighborhood of Belgrade there are
favorable breeding grounds for the
malaria mosquitoes. The heavy
spring floods made the plains facing
the town more swampy than usual
and those whose blood pleases the
mosquito palate are constant in
their lamentations.

Now an ingenious locksmith of
the town has decided that some-
thing more drastic than the labors
of the Anti-malaria Commission
should be undertaken and he has
devised a wonderful apparatus for
the mass capture of the pest. The
first evidence Belgrade had of his
experiments was the appearance in
Kamenegden, the little park that
overlooks the plains and the meet-
ing of the rivers (Sava and Dan-

ube) of a powerful searchlight. It
was thought the police had adopt-
ed a new means of raking in va-
grants bedded in the park. It was
really the mosquito trap, and any-
one who approached the apparatus
saw the inventor remove a vessel
from the inside and show it to be
full of a cushion-like mass of mos-
quitoes.

Expert officials who were present
at the trials have decided, it ap-
pears, that the apparatus is too cost-
ly for use as a means of extermina-
tion, but that it will prove very
useful as a specimen catcher. A
strong searchlight attracts the in-
sects into the conical light-projector
at the apex of which is a small
hole. In the interior pumps and
fans produce a strong current of
air into the interior and the mos-
quitoes are sucked inside.

MADAWASKA CROPS ARE BEST IN YEARS

The crops in Madawaska county
are better this year than they have
been known to be for several years.
There has been a considerable
amount of rainfall this summer,
which has greatly benefited the
crops. There will be a plentiful
supply of hay this year. The grain
fields are well advanced and the
potato fields are looking fine.

A Fox Show Will Be Held

A live fox and fur show open to
the world is to be held in Char-
lottetown in 1925 according to a
decision reached at the annual
meeting of the Silver Black Fox
Breeders Association of Prince
Edward Island. The meeting ex-
pressed the opinion that inasmuch
as the Island was the cradle of
the fox industry its capital city
was the proper place for the hold-
ing of such an exhibition at which
it is expected there will be several
thousand animals on show.

when Ed Collins, veteran second
baseman halted the game and motion-
ed to Manager Evers to substitute
another centre fielder for Maurice
Archdeacon, the young speed mer-
chant. Evers took the hint and
sent Johnny Mostil to centre.

As it happened Jamieson ground-
out to the infield for the final out.
The strategy wasn't needed. For
strategy it was.

Collins remembered that Burns
started the inning with a double to
centre, that pinch hitter McNulty
then on second reached there on a
double to centre and that pinch
hitter Gardner fled to centre.

He realized that a run would tie
the score and that another hit to
centre might mean that run with
Archdeacon fielding it. McNulty
is known to be fast and Collins
knew that Archdeacon has a poor
throwing arm. Mostil, while not
as flashy a fielder, has a better whip
Collins knew that a pretty throw
from centre on a hit to that field
might cut off McNulty at the plate
and save the game for the Sox.

Used His Brains To Win This Game

A recent game between the In-
dians and White Sox had a ninth
inning like this:
The Indians at bat in the final
half. Pat McNulty on second with
the tying run and two men out.
Charley Jamieson, lead-off man
and dangerous hitter came to bat.
Then fans wondered "what was up?"

"Exhausted Nerves and Palpitating Heart"

Mrs. L. Whiting, 202 King St. West, Brockville, Ont., writes:

"I took very sick with my nerves and stomach, and seemed to
be all run down. At times my heart would flutter and palpitate so
and I would take such weak spells in the pit of my stomach that
I sometimes thought I would never get better. I tried
several doctors, but it seemed nothing they gave
me helped. I had almost given up hope when a friend
advised the use of Dr. Chase's Nerve Food. I tried
it, and can say it certainly has done wonders for me. I
did not stop until I had taken twenty-five boxes."

Dr. Chase's Nerve Food
60 cts. a box of 60 pills, Edmanson, Bates & Co., Ltd., Toronto

Students Storm and Capture Rocky Heights

Top Left—Encamped near the Columbia Ice Field. Mount Columbia, second highest peak in the Rockies, is seen in the background. Below—One of the peaks recently scaled for the first time in history. Inset—Field-Harris party nearing their objective. Right—Edward Fuez, famous Canadian Pacific Railway Swiss guide, who led the Field-Harris expedition, conquering five new peaks in the Columbia Ice Field.

Five peaks in the Canadian Rockies have just been con-
quered for the first time by three Harvard and Hotchkiss
students who were accompanied by their Swiss
guides. The students who climbed and named the new
peaks in the famous Columbia Ice field are Osgood Field,
Frederick Field and Lemond Harris of Boston. They
were led by the noted Canadian Pacific Railway guide
Edward Fuez, the oldest guide in point of service in the
Canadian Rockies. Two of the newly conquered peaks
have been named Mount Harvard and Mount Hotchkiss
after the two American universities.

The party made five first ascents including the hitherto
unconquered Mount Patterson, 10,400 feet, Mount Sir
James Outram, 10,700 feet, the South Twin, 10,600 feet
and the unnamed peaks, Harvard and Hotchkiss. Besides
all this they discovered a new route to the top of the
second highest peak in the Rockies, Mount Columbia,
12,000 feet, which was made in a return journey of
twenty-three hours. The aim of the exploring party, to
conquer the South Twin, was successfully attained.

The Field-Harris party left Lake Louise five weeks ago
accompanied by two guides, five packers and nineteen
horses, and travelled 200 miles into the Columbia ice
field. Their progress was halted several times by the
terrible winds from the ice fields and once they were
forced to halt a day at Mistayah lake in order to make
rafts with which to get their horses across. Here, at the
foot of Mount Patterson, they put up a bivouac camp and
accompanied by the weird howling of the wild ice winds of
this district spent most of their night thrubbing a ukelele
and singing warm southern songs.

Lemond Harris had his own Swiss guide with him,
Joseph Biner who has guided him for many years in the
Swiss Alps. Edward Fuez who has been guiding in the
Canadian Rockies since 1903 was the man who success-
fully manoeuvred this valuable expedition. The greatest
novelty of the trip, he stated on his return, was the
meeting of fourteen American girls on the lonely forks of
the North Saskatchewan River, who were travelling alone
with their packers. The girls insisted that the party stop
off for dinner with them that night, following which a
note of civilization was added to their wild northern
environment by the sound of the Ukelele and the swish
of dancing feet over pine needles dimly lighted by a
blazing log camp fire.
