TORONTO'S CANDIDATE FOR LONDON

Views of the Official Organ of Organized Labor in London.

Referring to the candidature for London of Mr. Meredith, corporation counsel of Toronto, the Industrial Banner, the official organ of organized labor in this city, says:

"There is nothing small about Toronto. She is not content with wanting four city members in the Ontario Legislature, but manages to pick candidates for a score of rural constituencies as well. She is now reaching out after rival cities, and London is expected to elect her able solicitor to swell the crowd. Toronto is no hog, she doesn't want the universe. Give her all the land and someone else can have the water. She is always willing to go halves so long as she gets the solid half. Great head! Some day she will have the right to elect the whole Legislature; she has only got to go ahead as she is doing, and 'Get there, Jacob,' is the word while other people pay the piper."

Striking Miners Resort to Serious Acts of Violence—Labor Notes.

STRIKERS WHO STRUCK.

SPRING VALLEY, Ill., May 23.—About 200 striking coal miners marched to the works near here this morning and drove the men from the mines. They met with resistance and a battle with clubs and stones ensued. The strikers banked the fire and nailed up the entrance to the mine. A force of 50 deputies charged on the strikers and captured one of the ring leaders. The mob followed the deputies to the jail, and after breaking down the door liberated their fellow-striker.

ST. PAUL, Minn., May 23.—The delegates to the convention of the Brotherhood of Locomotive Engineers elected officers this morning. Grand Chief Arthur holds over. A. B. Youngson, of Mendocino, Pa., was re-elected assistant grand chief engineer; T. S. Ingraham, first grand engineer or recorder; C. H. Salmons, of Aurora, Ill., second grand engineer. By virtue of his office Mr. Salmons becomes editor of the Brotherhood Journal.

CANADIANS SHUT OUT.

BUFFALO, May 23.—A bill has been signed by the Governor which makes it a misdemeanor for any municipality in this State, or any contractor doing business for any city, village, town, county or the State, to employ other than citizens of the United States in such work. The bill seems to have got through both branches of the Legislature without much publicity, but it is one of the most important in character which the State has ever had placed on its statute book. It not only affects a very large number of Canadians, but will necessarily deprive of employment many thousands of Poles, Italians and Hungarians.

So quietly has this legislation been carried that not a city official here has as yet seen a copy of the bill.

Owing to the miners' strike there is not enough coal in Des Moines, Iowa, to run the waterworks.

The British warship Fearless which has been ordered away from Port Said is detained there owing to her inability to take on coal because of the coal porters' strike.

The Chinese Government propose to stop strikes by beheading the strikers.

The bituminous coal operators of Central Pennsylvania have given the men till May 28 in which to return to work. If they fail to do so, the mines will be thrown open to whoever seeks employment.

The G. T. R. Company Win.

WINDSOR, May 23.—This morning Judge Horne, of Windsor, handed down the decision in the case of the appeal of the Grand Trunk Railway against the assessment placed on their property in Windsor. Commissioner Black raised their assessment, and the Court of Revision ratified his action. The case was appealed, and Judge Horne, of Windsor, and Judge Bell, of Chatham, heard the evidence. Their decision reduces the amount by \$125,000. The matter has been in dispute for some time and is one of the greatest importance as the rate for the city could not be struck till it was settled. It is considered a big victory for the railroad company.

the Congo free State has been concluded between King Leopold and the British Minister to Belgium. The King has recognized the British sphere of influence as indicated in the Anglo-German treaty of July 1, 1890, and abandons to England a small strip of territory in the region of Upper Congo and Lake Tanganyika, thus giving England access northward to the Nile. The exchange England grants to the King until the end of his reign the left bank of the Nile up to the seventeenth degree. This is considered the most important African treaty concluded for many years, and is a master stroke of diplomacy on the part of King Leopold, as it shuts out France from the Nile basin, and places the Congo free State under the obligation of fighting the Sudan dervishes.

PARIS, May 23.—The Temps and Debate publish hostile comments on the new Anglo-Belgian treaty as to African territory. They say that the treaty gives the Congo State access to the valley of the Upper Nile, assuring to Great Britain the strip of territory between Lake Edward and Tanganyika. "Such a violation of rights of Egypt and France," says the Debate, "it is impossible to permit."

The Bullet-Proof Coat.

LONDON, May 23.—Herr Dowe, the Mannheim tailor, gave an exhibition and practical test of his bullet-proof coat at Alhambra to-day, in the presence of the Duke of Cambridge and several hundred army and navy officers. The garment was a cuirass two inches thick. A committee composed of well-known officers were supplied with Lee-Mitford German army rifles charged with cordite regulation cartridges. The committee first fired at a target composed of elm logs 30 inches thick, and pierced it through and through. Shots with the same rifles and similar cartridges were then fired at the cuirass, but beyond a slight impression of the impact of the bullet it was not injured. The Duke of Cambridge and others examined the cuirass after the firing and pronounced the test a complete success. Herr Dowe will shortly furnish for purposes of testing a smaller and lighter cuirass.

Perils of Ocean Racing.

QUEENSTOWN, May 23.—The passengers on board the steamer Majestic assert that the Paris crossed the Majestic's bows from north to south. The Majestic anchored in the Mersey at 4 o'clock this afternoon. Many passengers confirmed the report that the Paris had crossed her bows within a dangerously short distance. They spoke with much indignation of the incident, saying it had nothing to do with the race, but was due to a spirit of pure bravado. The Rev. Edward Hill, of Montreal, said he had no objection to strengthening his statement with his name. "Until Saturday," he said, "the angle of the vessels' courses was increasing gradually. On Saturday the Paris crossed our stern. She passed to the left and then signalled that she wished to cross our bow. Our captain slowed up and allowed her to pass. What might have happened was shown by the fact that the fog afterward became suddenly so dense that both vessels had to use their fog horns."

Capt. Wm. C. Randle, of the Paris, said: "The Majestic was astern until Saturday morning, when she crossed the bows of the Paris from port to starboard. She remained on the starboard side until about 3 o'clock, with a distance of half a mile between the vessels. The Paris then forged ahead, still keeping half a mile off. When the Majestic found that she was being dropped astern she slowed down and crossed the stern of the Paris." Capt. Randle denied emphatically that there was any ground for the sensational reports of danger of a collision.

Death of an Eminent Canadian.

LONDON, May 23.—Prof. Romanes died suddenly to-day. George J. Romanes, F.R.S., L.L.D., was born in Kingston, Canada, May 29, 1848, his father being the late Rev. Prof. Romanes, M.A., L.L.D. He spent his boyhood in England, France, Germany and Italy. In 1867 he entered Gonville and Caius College, Cambridge. He graduated in natural science in 1870 and was Bruney prize essayist in 1873 and 1875. Having published a series of papers on the nervous system of medusae he was elected a fellow of the Royal Society in 1879. In 1881 he received the honorary degree of LL.D. from the University of Aberdeen. While still at Cambridge he formed an intimate acquaintance with the late Mr. Darwin, and afterwards continued to be an ardent worker on "The Origin of the Human Faculty," and his paper on "Physiological Selection," and additional suggestions on the origin of species, have given rise to animated discussion. "His 'Jelly Fish, Star Fish and Sea Urchins' is a popular exposition of his Royal Society paper. Mr. Romanes was a full-time professor of physiology in the Royal Institution of London, and Rosebery lecturer on natural history in the University of Edinburgh. His extensive treatise entitled "The Philosophy of Natural History Before and After Darwin" is a copiously annotated publication of the lectures delivered in both these capacities. He was also well known as a lecturer at the Royal Institution, and was an active contributor to periodical literature on matters of scientific and philosophical interest.

Sir Oliver's Administration Will Be Sustained.

A Warm Tribute From British Columbia.

Mr. Dack the Man that Center Bruce Delights to Honor.

TRIBUTE FROM BRITISH COLUMBIA.

The Vancouver (British Columbia) World says: "That Sir Oliver Mowat's Administration will be sustained at the polls now admits of no doubt. The Grand Old Man has given his Province one of the purest and strongest Governments that the Dominion has ever known and as he approaches very old age Sir Oliver can look upward and truthfully declare that his hands are clean of any wrong. Scandals have been charged against him by designing men—of whom no country would seem to be entirely free—but under the search light of public criticism they have been found to be foundationless. As British Columbia there are those who scruple not to say Johnny at the doors of Ministers, without the courage or the ability to prove their charges and insinuations, so in Ontario the Premier has had to deal with the tribe, only to come out of the fiery furnace scathless. We are very pleased to learn that religious-political machines intended to do him injury, have recoiled on the heads of those who in their wanton wickedness invented them and that the true manhood of the Province has risen up in arms against the bloodthirsty weapons of the ignorant and depraved. Good as a rule prevails over evil in men's natures, and once they commune with themselves and question their consciences their better selves rise to the surface. The only way to make this loved Canada of ours a great and glorious nation is by sinking all racial and religious strife and working unitedly for the common end we all have in view. The disturbers of good neighborhood ought to be frowned down upon by all patriotic citizens and driven out of the community. Though professing to be followers of Christ, they fail to practice in their daily lives the simplest of his teachings. Charity—the greatest of all virtues—is unknown to them."

MR. DACK RENOMINATED.

KINCARDINE, May 23.—The Liberal convention for Center Bruce was held at Glammis yesterday and was largely attended, every municipality being well represented. The veteran Liberal, Mr. John Corbett, of Kincardine township, presided, and Angus Martyn acted as secretary. There was unbounded enthusiasm, and a determination expressed on every hand to hold the riding for the Mowat Government. There was a fair sprinkling of Patrons present, who will work heartily in the Liberal ranks. Walter M. Dack, the present member, J. C. McIntyre, of Elderslie; P. J. Brown, of Kincardine township; David Henderson, of Huron township; D. B. McCallum and Hector Cowan, of Paisley; Andrew Malcolm and James A. Macpherson, of Kincardine, were named, but all except Mr. Dack retired, and Mr. Dack's renomination was made unanimous by a standing vote. Mr. Brown, who did great service for Patron McNaughton in North Bruce in December last, announced himself a supporter of the Liberal nominee. Mr. Dack accepted, and afterwards addressed the convention at some length.

NOTES.

Hon. G. W. Ross speaks at Oakville next Monday night. The Liberals of Center Bruce have renominated Mr. W. M. Dack, M.P.P. Mr. T. O. Currie, of Strathroy, organizer of the Patrons of Industry, is making a regular tour of the Ottawa section, devoting special attention to Glangary county.
