Fig. 1 shows the simple manner in which the lock is detached or replaced. Fig. 2 shows the bottom cover plate with spring catch at end to secure it in position. Fig. 3 shows the detachable lock, containing hammer, mainspring spring, sear, sear spring and cocking lever.

In every hammerless gun there are hammers, mainsprings, sears, sear springs, and cocking levers. Some of these are liable to go wrong. When attending a tournament, or starting on a three weeks' hunting trip, it makes you mighty comfortable and easy to know that in case of a mishap to your lock you have a duplicate which can be inserted in ten seconds.

If your gun gets wet or damp, you can remove the locks instantly, oil and clean them yourself before they rust. The gunsmith is dispensed with.

There are no pin or screw heads on the side of the gun to mar its appearance and finish.

This hand-detachable lock in conjunction with our reliable one trigger makes a most unique and modern gun.—
