Please let us not deny facts. It is so. True there have been and still are soldiers who's idea of playing the game is all crooked (there are civilians of the same calibra also). Why You Are Paying War-Prices In Peace Times

The serious concern about the mounting costs of necessities was shown not long ago when twenty-siz Democratic members of the Massachusetts Legislature cabled to President Wilson that "The citizens of the United States want you home to help reduce the high cost of living, which we consider far more important

A man's suit of clothes that cost \$15.00 in 1914 costs \$26.00 today; shoes that were \$9.00 in 1914 cost \$15.50 now; a woman's suit that cost \$15.00 in 1914 is \$24.00 today; every item in both men's and women's wearing apparel has nearly doubled in price, while food, shelter, fuel, heat, and light, have soared to equally high levels. This condition prompts the Detroit News to declare that "what the eating, sleeping and dressing world wants to know is whether the cost of necessities is justified?" The consumer finds it hard to understand, according to the Buffalo Evening News, "why six months after the end of fighting prices, instead of taking a fall, are forever rising."

THE LITERARY DIGEST presents this week in its leading article a comprehensive survey of the elements affecting present living costs; comparative tables showing the difference in prices of many articles in 1914 and today, the opinions of bankers, merchants and manufacturers as to the future outlook, and the observations of editorial writers throughout the country on the situation. This article should be of practical value to every DIGEST reader.
