COBALT--Mining Securities Display Better Underlying Strength--COBALT

THE TORONTO WORLD

Trading in Mining Stocks Quiet

of the Active Specialties.

World Office, Monday Evening, May 16. Altho the trading was quiet at the

Timiskaming, Nova Scotia, Beaver, La Rose and Nipissing.

The improved market for the higher-priced issues has been beneficial to the market in general, and the tracing sentiment in mining circles is much more favorable to-day than it has been. Beaver rallied over a point, Timiskaming an equal amount, while La Rose and Nipissing made advances of several points.

The shipment of another car of ore last week from Beaver was respon-

The shipment of another car of ore last week from Beaver was responsible for a better demand for that stock. While Timiskaming is being picked up by those who were satisfied by the first quarterly statement issued by the company, the market as a rule closed firm and the prevailing opinion is that an advance of great dimensions is warranted by the present condition of the market.

SENTIMENT IS IMPROVING.

There is a considerable betterment in the feeling in regard to the Cobalt securities owing to the knowledge that the camp has never been in such an active development stage.

Recent good discoveries on Rochester, the Lawson of the La Rose group, the excellent results being attained from the Beaver and the introduction of power which is enabling many mines to produce a large amount of concentrates. Recent visitors to the camp are all enthusiastic in regard to the future and believe that it is only a question of time before the public a question of time before the public recognize that the mining stocks have not yet recognized the great genefits which have occurred to most properties in the camp since a year ago.

PROVINCIAL MINE SHIPS

Thirty-Two Tons Consigned to Bureau of Mines by Ontario Govt.

Discussing the ore shipments from the complany operating the camp last week The Cobalt Nusget Says:

The 32 tons sent from the Provincial is not from the company operating the property but from the Octation Government. This ore has been lying in the ore house at the old government owned mine now for certainly eighteen months awaiting shipments. It was not sent direct to any smelter, but was consigned to the Bureau of Mines in Toronto. Mr. E. T. Corkill making the shipmingment in 1908 and the consignment owned mine during the operation as a state property shipped 108.34 tons altoegther.

TO MAP PORCUPINE

Prof. Miller With Efficient Staff Inspecting the Gold Camp.

The importance attached to Porcupine among the young camps of Ontario is shown by the fact that when the different locations for the geological survey were made Professor Miller took the district in the Frederickhouse country and went in with a party that will be increased to seven. With him went in Mr. Cyril Knight, who helped the head of the surveys in his work in the Cobalt district. They will go in by 228 1-2, and will lein at Porcupine other well known members of the Ontario service. Their object during their five or six weeks' wat will be to carefully map the distance.

FIFTEEN TON PLANT

Good Results-News of the Camp.

COBALT, May 18.—According to Mr.
A. T. Budd, who has just returned from Porcupine, the Timmins are now erecting on their own property a crusher amalgamating and cyanide plant of fifteen tons capacity. He also states that the ore from cross cut in the No. 2 shaft went \$347 to the ton at sixty feet down.

Mr. Budd is of the opinion that the public generally does not yet realize what a great camp Porcupine is. The ore bodies are large. The ore could not be more desirable from a treatment point of view and the values are most satisfactory.

Mr. Budd reports that the richest ore shipped from the Hollinger-Mc-Mahon came from the cross cut in the No. 2 shaft. All the ore taken from the cross cut at 60 feet was shipped and sampled separately. This ore assayed \$347 per ton. The vein is 11 feet wide and is full of sulphides thruout. It is not a pay streak proposition. No signs of any oxidation were found in the cross cut.

There are now \$0 men at work on the Hollinger. The compressor and electric light plant are in operation. Seventy acres of the property have been cleared of timber. A crusher amalgamating plant and cyanide plant of fifteen ton capacity is on the property and is now being put up. This plant will turn out gold bricks this summer and at the same time will give owners a much better idea of the values than assays would.

Convicted at Kansas City of poisoning Col. Swope in a sensational way. The jury were out from 10 p.m. Friday until 10.30 yesterday morning.

DR. HYDE GUILTY OF

Jury Out Over Two Days-Tried on Eleven Separate

was found guilty at 10.23 o'clock to-day of murdering Col. Thomas H. Swops. His punishment was fixed at life im-

prisonment.

"I will file a metion for a new trial and then take an appeal in the case," said Frank P. Walsh, chief counsel for Dr. Hyde.

The verdict came unexpectedly. Every attorney in the case had given up hope of the jury, which had been out since Friday night, reaching an agreement.

It was reported this morning that one juror vowed he would "vote for acquittal until I die of old age."

Dr. B. Clark Hyde has been under suspicion in connection with the mysuspicion in connection with the mysus also treated by Dr. Hyde, had a convulsion after taking a capsule, but she was given an emetic at once by Dr. Twyman, and recovered.

acquittal until I die of old age."

Dr. B. Clark Hyde has been under suspicion in connection with the mysterious illness and deaths in the Swope family ever since the death of Colonel Thomas H. Swope, on Oct. 3, 1909.

The death of Col. Swope followed soon after he had suffered a severe convulsion, and this convulsion, it was charged by members of the Swope family, followed immediately after the administration of a capsule given by direction of Dr. Hyde. Dr. Hyde said it was a digestive tablet.

It was proven at the trial that Dr. Hyde had purchased cyanide of potas-
