Look at the advantages you posses Our country is entirely free from contagious diseases of cattle, while almost every other cattle producing country in the world is scourged by cattle plagues which ruin the breeders, and have rendered stock raising an extremely precarious occupation.

The direct effect is that our cattle are at a premium in all European countries. We have the very best facilities for carrying on a large export trade; our rapidly developing railway systems, our increasing our cattle raising, and offer great inducements to change our system of farming.
