MENDING UMBRELLAS.

Sometimes an umbrella that begins to show tiny cracks and pinholes may be mended at home. Open the umbrella and hold it up to the light. Mend the holes on the inside with black silk courtplaster cut slightly larger than the holes. Sun umbrellas and parasols are more effectively mended in this way than umbrellas, which sometimes require a repetition of the mending after being thoroughly wet.

MISCARRIAGE OF JUSTICE.

The fools are not all dead yet. One in Pennsylvania took his dog to the woods and tied a stick of dynamite with a fuse to his neck. Then light the fuse he let the dog go. Though the fellow ran for all he was worth the dog kept close to his heels. When he got into the house the dynamite exploded. The dog was killed and the house was wrecked, but unfortunately the man escaped.

KARL CREELMAN IN MANITOBA.

Karl M. Creelman, of Truro, N. S., who made a bicycle tour of the world, will settle down on a Manitoba farm. Mr. Creelman started from Truro, N. S., in 1899, and with-out a cent in his pocket, completed a journey around the world, riding all the distance as far as possible on his bicycle. His tour occupied two years, three months and twenty-four days, and the entire trip over land and sea covered 49,751 miles. In the mountains of West America, and the deserts of Australia and Egypt, Mr. Creelman walked over 1,600 miles. The book carried by Mr. Creelman during his trip contains the government stamps and autographs of men in Australia, Italy, France, Germany, England, Ireland and America. Mr. Creelman now turns up in Manitoba, where he intends settling down.

THE INDIVIDUAL MAN.

(From an Address by Albert Shaw at the Forty-First Quarterly Convocation of the University of Chicago.)

I propose today to say something about the position and prospects of the average young man in the face of vast current and impending changes in economic and industrial life. It is obvious that there are prevalent just now two kinds of interest and anxiety in view of the enormous transitions that are taking place among us. Let me say at once, to relieve suspense and not to carry any needless air of gloom, that I for one do not believe in the least that there is any real shrinkage of opportunity in life for the worthy young man, or that the new conditions really threaten the prospects of the individual.

WELL POSTED.

That the next best thing to knowing the law is knowing where to find it was illustrated once when Judge Simeon E. Baldwin of the Yale law school in an examination on corporations asked his class a question which was extremely difficult. A certain complex state of facts was given, and the question ended with: "A client comes to you and states the above case. What would you advise him to do?" The best answer handed in was: "I would advise him to come around at 10 o'clock the next morning. In the meantime I would look it up."

REINDEER IN ALASKA.

Good reports come from the results of the government experiment in introducing the reindeer into Alaska. It is said there are now over 4,000 of the animals in the territory and that the increase is about 30 per cent a year, and that the American born are larger and stronger than the imported stock. In fact, it is predicted that within a few years the Laplanders will be sending Alaska to get reindeers to breed from to improve their own animals.—San Francisco Call.

LABOR TROUBLES

May Affect Telephone Service in Every Southern City.

NEW ORLEANS, La., Sept. 12.—At a meeting of the local union No. 4, International Brotherhood of Electrical Workers, yesterday, it was decided to attempt to carry the strike of the telephone linemen to every city in the south in which the Cumberland Telephone and Telegraph company operates. F. E. Lockman of St. Louis, International vice-president, was present at the meeting and directed the deliberations, so far as the sweeping action was concerned.

A session of the international officers of the Telephone Linemen's Union has been called to meet at Washington on September 16, and it is said that the future policy of the New Orleans strike will then be passed on.

TRIESTE, Sept. 12.—The garrison here has been reinforced by two battalions of infantry as a precautionary measure in consequence of the strike of dock laborers. Three of the arrested leaders have been released.

As a result of the arrest of the ring-leaders of a recent demonstration at Trieste seven hundred dock laborers and others struck work yesterday and the work of the port was much affected. The demonstration which led to the trouble was organized with the object of compelling the authorities to suppress a newspaper which had made itself unpopular with the workmen.

THE ENGLISH MAIL

Will Be Slower After the First of October.

LONDON, Sept. 12.—After October 1, mails for the White Star line steamers will not reach Queenstown until 10.15 a. m., Thursdays, instead of 7 a. m., as at present, thus considerably delaying the departure of those vessels. The reason for the alteration in time is the refusal of the White Star line to further co-operate with the general post office in accelerating the mail boat service from London to Dublin. The company has hitherto contributed \$300,000 yearly towards the acceleration, but it now says it is no part of its duty to continue such an outlay, and the post office therefore is reverting to slower trains.

COLOMBO, Ceylon, Sept. 12.—A boat containing the first officer and five men of the British steamer Nithsdale, has arrived here. The officer reports that the Nithsdale grounded on a reef south of Cardina, one of the Maldiv Islands in the Indian Ocean, September 8. All hands are safe. The steamer is in a precarious condition owing to the danger of her slipping off the reef. She has a cargo of 4,000 tons of sugar. The Nithsdale was built in 1900, and is owned at Glasgow.

A MEAT TRUST

Second Only to the Steel Trust in Magnitude.

Consolidation of Packing Interests With Hundreds of Millions of Capital.

CHICAGO, Sept. 12.—The Record-Herald says today: The long expected merger of the great meat packing interests of the United States will go into active operation Saturday, Sept. 27, unless there should be an entirely unlooked-for change in the plans agreed upon by all those concerned in the deal at a meeting held here today. An industrial combination, second only to the Steel Trust in point of magnitude and importance, is, therefore practically an accomplished fact.

Reports concerning the actual terms of the consolidation differ. The most reliable light shed upon the subject was the plan outlined by a Boston authority, who has possessed the most inside information about the deal ever since its existence was first rumored in the early part of last spring. According to this expert the new packing combine is to be capitalized at the rate of twenty-five times the last year's earnings of the constituent companies. For example, Cudahy & Co. are said to have earned about \$820,000, in 1901, which would make their share of the capital stock of the merger \$21,000,000. A four per cent dividend that the new consolidation might be expected to declare would amount to \$840,000, on this lot of stock, approximate its legitimate earnings. On the basis of capitalization Armour & Co., whose last year's profits are supposed to have been about \$8,000,000, will receive \$200,000,000 in the new securities in exchange for their business. Swift & Co. will receive \$50,000,000, their net earnings for the past year probably not amounting to more than \$2,000,000 by reason of the fact that this concern does not own its subsidiary companies, such as car lines and selling agencies. Carrying out this method to the end the Schwarzhild & Sulzburger company would receive \$25,000,000. It is said that it is the undoubted determination of the consolidated meat interests to control all the packing houses and stockyards of the company and save every possible dollar in the cost of manufacturing and distribution. In addition to this all by-products will be absolutely controlled and efforts made to buy up industries that are closely allied to the meat business.

THE COAL STRIKE.

The Men Declare They Will Hold Out Longer.

TAMAQUA, Sept. 12.—Officials of the coal companies state that on Monday two more breakers in this section will be converted into washeries, one in the Panther Creek Valley and another on the outskirts of this place. It is said that the two plants will ship over one hundred tons of coal a day. A force of deputies is being secured to guard the operations.

Nearly all the local unions of the United Mine Workers in this vicinity have held meetings at which the strikers re-affirmed their allegiance to President Mitchell and pledged themselves to stay out until the coal companies grant concessions, no matter how long it may be.

The men apparently have little hope that the meeting of Mitchell and Governor Stone in Harrisburg tomorrow will have much effect on the strike situation.

POTTSVILLE, Pa., Sept. 12.—A number of local branches of the United Mine Workers in this district at the regular weekly meetings have adopted resolutions expressing their intention to remain on strike until ordered back to work by National President Mitchell or by a convention of mine workers.

Porter read a paper in the Economic Section on the subject of Municipal Trading, pointing out that American experience showed there was no wisdom in this form of civic enterprise, which was so rapidly increasing municipal debts in England. Mr. Porter advocated a wisely arranged leasing system which would secure steady revenues for the local treasuries and ensure good and cheap public services.
