

WYETH'S SYRUP

OF

Hydriodic Acid.

THIS Syrup is an excellent preparation for the exhibition of Iodine, on account of its non-irritating qualities, and the readiness with which it gives up the Iodine when taken into the stomach.

Hydriodic Acid, HI., is composed of 126.6 parts of Iodine and 1 part of Hydrogen, or each 100 parts contain 99.22 parts of Iodine and .78 parts of Hydrogen; these elements have such a slight affinity for each other that the acid is quite readily decomposed; and as heat and light cause this decomposition, it is very important to *keep this Syrup in a COOL, DARK PLACE; it should also be CORKED tightly.*

If it develops a red colour the decomposition has begun, and the Syrup is unfit for administration.

Each fluid ounce of this Syrup contains 6.675 grains Hydriodic Acid, which represents 6.66 grains Iodine, or is equivalent to 8.69 grains Iodide Potass.

This Syrup will be found to produce very good results in the treatment of Hay Fever, Chronic or Acute Rheumatism, Lupus, Asthma, Catarrh, Pneumonia, Goitre, Eczema, Scrofulous Diseases, etc.

REDUCED

We have reduced the prices of Wyeth's Syrup of Hydriodic Acid as follows:

- Per Demijohn, 28 fl. oz. from \$ 8.00 to \$5.00
- Per Winchester from 5.25 to 3.50
- Per doz. Bottles, 16 fl. oz. from 14.00 to 9.00
